Predictive Services Discussion: Very hot and dry weather will continue across the West this week. Northeast flow over southwest Oregon and northern/central California will bring poor overnight relative humidity recovery to coastal areas. Isolated wet and dry thunderstorms are expected along the Utah/Arizona border and in western Colorado. The Southwest will continue to see wet thunderstorms and increasing relative humidity. Warm conditions and wet thunderstorms are on tap for Alaska. Scattered showers will continue in the Southeast.

NFDRS Pocket Cards

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area.

● The Pocket Card provides:

- A general indicator of the potential for extreme fire behavior and difficulty of control.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Locally significant values for temperature, humidity, wind speed, and more.

● Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than 5%, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at <http://famweb.nwcg.gov/pocketcards/>. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the PocketCard for site specific fire behavior predictions and fireline actions.
