

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, July 29, 2008 – 0530 MDT
National Preparedness Level 4**

National Fire Activity

Initial attack activity:	Light (190 new fires)
New large fires:	3
Large fires contained:	3
Uncontained large fires:	38
Area Command Teams committed:	2
NIMOs committed:	1
Type 1 IMTs committed:	9
Type 2 IMTs committed:	5
Fire Use Teams committed:	1

** Uncontained large fires do not include WFU or confine/contain incidents. **

[Link](#) to Geographic Area daily reports.

A NIMO Team (Cable) is assigned as a planning and operational group in support of the National Multi-Agency Coordinating Group at Boise, ID.

Two MAFFS C-130 air tankers from the 145th Airlift Wing, Charlotte, North Carolina are supporting the State of California at McClellan Airpark in Sacramento, California. The Mission Commander is LTC Charles Davis, 145th Airlift Wing, Charlotte, North Carolina.

Australia and New Zealand are providing 44 fire specialists and managers to assist with fire suppression operations in California.

Northern California Area (PL 5)

New fires:	24
New large fires:	0
Uncontained large fires:	25
Area Command Teams committed:	2
Type 1 IMTs committed:	7
Type 2 IMTs committed:	2

Area Command Team (Lohrey) is managing fire complexes on the Shasta-Trinity, Mendocino and Six Rivers National Forests. Area Command Team (Anderson) is managing fire complexes on the Six Rivers and Klamath National Forests.

Lime Complex (2 fires), Shasta-Trinity NF. IMT 1 (Hughes). Fourteen miles west of Hayfork, CA. Timber. Active fire behavior with mid-range spotting and group tree torching. Residences, ranches and youth camps threatened. Evacuations and road closures in effect.

Iron and Alps Complexes (4 fires), Shasta-Trinity NF. IMT 1 (Opliger). One mile north of Junction City, CA. Heavy timber, brush and grass. Moderate fire behavior with flanking, backing and short runs. Community of Corral Bottom and power lines threatened. Evacuations in effect.

Panther, Klamath NF. Transfer of command from IMT 1 (Dietrich) to IMT 1 (McGowan) today. Fourteen miles southwest of Happy Camp, CA. Timber and brush. Active fire behavior. Structures threatened.

Ukonom Complex, Six Rivers NF. IMT 1 (Dietrich). IMT is also managing the Siskiyou Complex and the Blue 2 fire. Ten miles east of Orleans, CA. Timber. Moderate fire behavior. Structures, cultural sites, and telecommunication facility threatened. Road closures in effect.

Siskiyou Complex (2 fires), Klamath NF. Eighteen miles southwest of Happy Camp, CA. Conifer and hardwood overstory with heavy timber litter. Active fire behavior. Structures and cultural sites threatened.

Blue 2, Six Rivers NF. Twelve miles east of Klamath, CA. Timber. Moderate fire behavior with backing and group tree torching. Cultural and communications sites threatened. Trail and road closures in effect.

Bear Wallow Complex (2 fires), Klamath NF. IMT 2 (Johnson). Confine/contain management strategy. Thirteen miles southeast of Happy Camp, CA. Timber and brush. Active fire behavior with isolated single and group tree torching and short-range spotting. Residences threatened. Voluntary evacuations.

Yolla Bolly Complex (3 fires), Mendocino NF. IMT 1 (Larsen). Forty-seven miles southwest of Redding, CA. Timber. Backing fire with short uphill runs, isolated torching and short-range spotting. Residences and cultural sites threatened.

Canyon Complex (6 fires), Plumas NF. IMT 2 (Sciacca). Sixteen miles northeast of Paradise, CA. Timber. Moderate activity with backing fire.

BTU Lightning Complex (2 fires), Butte Unit, Cal Fire. Cal Fire IMT 1 (Streblow). Twenty-seven miles north of Yuba City, CA. Timber, brush and logging slash. Minimal fire activity with spotting.

American River Complex, Tahoe NF. Eleven miles northeast of Foresthill, CA. Timber, brush and chaparral. Minimal fire behavior.

 Type 2 IMTs committed: 2

Evans Road, North Carolina Division of Forest Resources. Transfer of command from Florida IMT 2 (Utley) to North Carolina IMT 2 (Hendricks) yesterday. Seven miles south of Creswell, NC. Pocosin, chaparral and southern rough. Ground fire in deep organic soils. Residences threatened.

Ravia, Central & Western Office, Oklahoma DOF. Six miles northwest of Tishomingo, OK. Red cedar and grass. Wind-driven fire activity with torching and spotting. Community of Mill Creek threatened.

South 1, Great Dismal Swamp NWR. Twelve miles southeast of Suffolk, VA. Logging slash and blow down. Smoldering in deep organic soils. Precipitation occurred over the fire area yesterday.

Bradley Ranch, Texas Forest Service. Started on private land twenty miles west of Wichita Falls, TX. Brush. Creeping and smoldering.

Rock Creek, Texas Forest Service. Started on private land eighteen miles southeast of Vernon, TX. Juniper and brush. Active fire behavior.

Hwy 62, Texas Forest Service. Started on private land sixteen miles southeast of Wellington, TX. Juniper and brush. Creeping and smoldering.

Lake Charles #29, National Forests in Florida. Eighteen miles northeast of Ocala, FL. Southern rough. Smoldering.

Predictive Services Discussion: Windy conditions are expected from the northern Sierras to the Rockies. Mixed wet and dry thunderstorms are on tap over portions of the northern Great Basin, Northern Rockies and eastern Oregon. Dry weather will persist over California as well as central and northern Texas.

Wildland/Urban Interface Watchouts

The primary consideration is to first assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structures. The first step in conducting a safe operation is to assess whether the firefighting operations can be conducted safely.

● Consider the “Wildland/Urban Interface Watchouts” in completing a risk analysis for the urban interface area to be protected. Remember there are three categories of structures:

- Those that are not threatened.
- Those that are threatened.
- Those that have already been lost or too dangerous to protect.

● Wildland/Urban Interface Watchouts:

- Poor access and narrow, one-way roads. A rapidly spreading fire could trap apparatus and personnel before they can turn around or move away from the flames and smoke.
- Observe bridge limits. Exceeding bridge limits could lead to bridge failure with a resultant blocking of ingress/egress routes that could result in the loss of an escape route or loss of equipment.
- Inadequate water supply. Without a reserve supply of water, the fire can overtake an area before the fuels can be cleared away.
- Natural fuels are located 30 feet or closer to structures on level ground. Remember structures on slopes require greater clearance. Structures are located on canyon slopes or “chimneys” on slopes of 30% or more with continuous, flashy fuels. The resulting rate of spread of any fire in this terrain can quickly extend beyond control.
- Extreme fire behavior: Situations involving crowning, large flame heights and erratic fire behavior can extend in an unpredictable manner beyond the control of any number of personnel. Strong winds of 25+ MPH: Winds increase the chance of spotting over the heads of firefighters and trapping them between both fire areas. Winds also cause greater preheating of fuels in the path of a fire front.

- - The need to evacuate the public, livestock, pets, and/or animals. This critical activity can pull personnel from the firefighting activity and can distract attention from fire behavior at a time when the greatest alertness is needed.
 - Propane and above ground fuel tanks that are next to wooden structures or close to vegetation
 - Power lines and poles: What is their location in relation to the structures that are being protected? Watch for both overhead and downed power lines.
 - Local citizens are attempting suppression activities. Lack of knowledge in fire suppression may lead to unsafe tactics.
 - Airtanker retardant drops and helicopter bucket operations: Establish communications and keep fire personnel out of the drop zone.
