Incident Management Situation Report
Tuesday, June 3, 2008 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (184 new fires)
New large fires:	3 (*)
Large fires contained:	0
Uncontained large fires:	7
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1
Fire Use Teams committed:	0

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 2)

New fires:	109
New large fires:	1
Uncontained large fires:	5
Type 2 IMTs committed:	1

Evans, North Carolina Division of Forest Resources. Eighteen miles south of Creswell, NC. Pocosin and southern rough. Extreme fire behavior with rapid rates of spread, torching, crowning and medium-range spotting.

Maybee Ranch, Texas Forest Service. IMT 2 (Hannemann). Started on private land eighteen miles north of Midland, TX. Shrubs and grass. Isolated hot spots. Last report unless significant activity occurs.

Tracy, National Forests in Florida. Three miles northeast of Paisley, FL. Pine and brush. Minimal fire activity with smoldering and occasional flare-ups.

Mustang Corner, Everglades NP. Ten miles northwest of Homestead, FL. Grass. No further information received.

Level, Florida DOF. Seventeen miles northeast of Naples, FL. Southern rough. No new information.

Predictive Services Discussion: Warm, dry and windy weather is expected over the Southwest, west Texas, southern Great Basin, and southern Colorado today. A few thunderstorms are possible over southern and central Nevada. The Southeast will see scattered thundershowers, mainly over the Appalachians and Florida.

Unburned Fuel Between You and the Fire

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical to direct attack a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- To reduce the risks:
 - Post lookouts
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
