

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, May 3, 2008 – 0800 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (89 new fires)
 New large fires: 4 (*)
 Large fires contained: 4
 Uncontained large fires: 11
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 1
 Fire Use Teams committed: 0

** Uncontained large fires do not include WFU or confine/contain incidents. **

[Link](#) to Geographic Area daily reports.

Southwest Area (PL 3)

New fires: 3
 New large fires: 0
 Uncontained large fires: 3
 Type 1 IMTs committed: 2

South Tularosa, Mescalero Agency, BIA. IMT 1 (VanBruggen). Four miles southeast of Mescalero, NM. Mixed conifer. No new information.

Trigo, Cibola NF. IMT 1 (Whitney). Eleven miles east of Belen, NM. Hardwood litter. Moderate surface fire with isolated group torching. Communities of Torreon and Tajique threatened and evacuations in effect for both communities.

X Fire, Kaibab NF. Three miles southeast of Tusayan, AZ. Ponderosa pine, sage brush and grass. Smoldering.

Southern Area (PL 2)

New fires: 49
 New large fires: 4
 Uncontained large fires: 7
 Type 2 IMTs committed: 1

Texas Winter Fires 2008, Texas Forest Service. IMT 2 (Hannemann). IMT managing the Huckabee and Price fires. IMT is supporting numerous fires throughout western Texas. Acres reported are a cumulative total.

Huckabee, Texas Forest Service. Thirty miles southwest of Fort Stockton, TX. Grass and brush. Moderate fire activity with short range spotting. Numerous structures, petroleum facilities, wind farm and a winery threatened.

Price, Texas Forest Service. Five miles northeast of Midland, TX. Grass and brush. Minimal fire behavior.

Tyler, Florida DOF. Seven miles west of Newberry, FL. Southern rough. Minimal fire activity. Structures threatened.

Willow Pond, Florida DOF. Three miles east of Hernando, FL. Short marshy grass. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Coastal, Florida DOF. Six miles north of Weeki Wachee, FL. Southern rough. No further information received.

Ogle Hollow, Great Smoky Mountains NP. Ten miles southeast of Maryville, TN. Hardwood litter. Last report unless new information is received.

Sunrise, National Forests in North Carolina. Fifteen miles northwest of Morgantown, NC. Hardwood litter. No new information. Last report unless new information is received.

HAZARD MITIGATION THROUGH RISK MANAGEMENT

“Risk management doesn’t get in the way of doing the mission – it is the way we do the mission.” The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

● Step 1—Situational Awareness:

- Obtain information.
- Scout the fire.
- Identify hazards—those likely to result in a negative impact.
- Consider all aspects of current and future situations.
- Consider known historical problem areas (Apply information from the Fire Danger Pocket Card.).
- Recognize the need for action.
- Demonstrate ongoing awareness of fire assignment status.
- Note deviations.
- Attempt to determine why discrepancies exist with information before proceeding.

● Step 2—Hazard Assessment:

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the Incident Response Pocket Guide) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability—how likely an event will occur; severity—consequences if the event occurs). Keep in mind that increased exposure time increases probability.

● Step 3—Hazard Control:

- Determine the best approach to mitigate or control the risk from the hazards assessed.
- Establish controls (e.g., anchor point, LCES, utilize downhill checklist, limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.
