

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, May 8, 2008 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (144 new fires)
 New large fires: 3 (*)
 Large fires contained: 1
 Uncontained large fires: 10
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 1
 Fire Use Teams committed: 0

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southwest Area (PL 3)

New fires: 10
 New large fires: 0
 Uncontained large fires: 2
 Type 1 IMTs committed: 2

Trigo, Cibola NF. IMT 1 (Whitney). Eleven miles east of Belen, NM. Hardwood litter. Smoldering.

South Tularosa, Mescalero Agency, BIA. Transfer of command from IMT 1 (VanBruggen) back to the local unit today. Four miles southeast of Mescalero, NM. Mixed conifer. Smoldering.

Southern Area (PL 2)

New fires: 65
 New large fires: 3
 Uncontained large fires: 7
 Type 2 IMTs committed: 1

Texas Winter Fires 2008, Texas Forest Service. IMT 2 (Hannemann). IMT managing the Byas Springs fire and supporting fires throughout western Texas. Acres reported are a cumulative total.

Byas Springs, Texas Forest Service. Started on private land twenty miles northwest of Kerrville, TX. Grass and brush. Wind driven fire. Residences evacuated.

Mathews, Texas Forest Service. Ten miles south of Eldorado, TX. Grass and brush. Rapid rates of spread. Residences and outbuildings threatened.

Bombing Range 15, National Forests in Florida. Twelve miles northeast of Altoona, FL. Brush and pine. Rapid rates of spread with isolated spotting.

Myakka Cut, Florida DOF. Five miles north of Clewiston, FL. Grass. Smoke impacting Highway 27. No further information received.

Grassy Island, Florida DOF. Three miles north of Clewiston, FL. Grass. Monitor fire.

Tyler, Florida DOF. Seven miles west of Newberry, FL. Southern rough. Minimal fire activity. Monitor fire.

Willow Pond, Florida DOF. Three miles east of Hernando, FL. Marshy grass. No further information received.

Wildland/Urban Interface -- Structure Protection

The primary consideration of any operation is to assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structure.

- Factors that may make an attempt to save a structure hopeless or too dangerous include:
 - The fire is making a sustained run and there is little or no clearance between the structure and the fuel.
 - The fire behavior is extreme; spot fires are numerous and the spread is outpacing containment.
 - Water supply will not last as long as the threat of the fire.
 - The fire's intensity dictates that you leave the fire area immediately.
 - The structure is constructed of wood and has a wood, shake roof.
 - The roof of the structure is more than one-quarter involved.
 - There is fire inside of the structure or windows are broken and there is no way to quickly repair them.
 - You can't safely remain at the structure because your escape route could become unusable.

- When implementing a plan to protect structures, consider the following:
 - Don't enter a burning structure unless you are trained, equipped, and authorized. Firefighter safety and survival is the number one priority.
 - Always stay mobile and wear all of your PPE.
 - Back in equipment to allow for a quick escape.
 - Coil a short, 1 inch charged line with fog nozzle on your engine for safety and quick knock down capability.
 - Don't make long hose lays. Keep at least 100 gallons of water reserve in your tank.
 - Check the road system before the fire approaches. Know bridge limits, alternate access routes, and turnarounds for your vehicle and other support vehicles.
 - Determine if residents are home. Leave on the inside and outside lights, regardless of the time of day. Close the garage door.
 - Place the owner's ladder at a corner of the home on the side with the least fire threat.
 - Coil and charge garden hoses.
 - Check and mark hazmat; e.g., LPG, pesticides, and paint storage.
