

National Interagency Coordination Center
Incident Management Situation Report
Saturday, May 17, 2008 – 0800 MDT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (103 new fires)
New large fires:	0 (*)
Large fires contained:	2
Uncontained large fires:	9
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2
Fire Use Teams committed:	0

** Uncontained large fires does not include WFU or confine/contain incidents. **

Southern Area (PL 2)

New fires:	4
New large fires:	0
Uncontained large fires:	5
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Brevard Complex (6 fires), Florida DOF. Florida IMT 2 (Beauchamp). Brevard County, FL. Southern rough. Moderate activity within interior and smoldering. Numerous residences threatened.

Myakka Cut, Florida DOF. Five miles north of Clewiston, FL. Grass. Moderate rates of spread with spotting. Residences threatened.

Mustang Corner, Everglades NP. IMT 1 (Quesinberry). Fifteen miles southwest of Kendall, FL. Grass. Wind-driven fire behavior with torching. Reduction in acreage due to more accurate mapping.

Mud Swamp New River, National Forests in Florida. Five miles northeast of Sumatra, FL. Southern rough. Minimal fire activity.

LPGA, Florida DOF. Six miles west of Daytona Beach, FL. Southern rough. Minimal fire activity. Residences threatened.

Predictive Services Discussion: Hot and dry weather will continue in California, but with gusty offshore winds dissipating. A significant warming and drying trend is expected across Arizona, with isolated thunderstorms lingering in New Mexico and southwest Texas. Shower and thunderstorm activity along the Gulf coast will generally move offshore, but scattered storms will linger across the northern half of Florida.

Roadside Incident Response

Nationally, the number of injuries and fatalities among emergency responders who are responding to roadside incidents is increasing at an increasing rate. Although most wildland fires occur in remote areas, there are situations where wildland fire personnel are responding to fires along rural country roads, jeep roads, or major highways; the risk still exists for our firefighters. Below is a checklist of considerations that should be utilized when responding to fires and other incidents along roadsides:

➊ Considerations

- Firefighter and public safety will always be the number one priority.
- Utilize L.C.E.S. in all incident activities.
- Personal Protective Equipment will be used on all incidents.

➋ Upon Arrival at the Scene

Size up incident- see Incident Response Pocket Guide

- What has happened?
- What is happening?
- What will or could happen?
- Is this a HazMat situation?

➌ Risk Management Process-

- Decision Point, Go No Go. See the Incident Response Pocket Guide, page 1

➍ Tactical Considerations

- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway when ever possible to avoid traffic congestion.
- Personnel do not exit the fire apparatus until instructed to do so by the module leader.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.
- Post a lookout to watch for and control oncoming traffic.
- Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
- Utilize and place road flares or other traffic warning signs when ever possible
- If equipment needs to be removed from the traffic side of the apparatus, one person will retrieve the equipment and a lookout will watch for oncoming traffic.
- Engine operators will operate pumps from the non-traffic side or from the cab of the apparatus when possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
- During night operations utilize reflective clothing, vests and other safety equipment as necessary.
- All emergency responses on roadways will be concluded as quickly as possible to reduce personnel exposure.
- Cancel or demob unnecessary apparatus as soon as possible.
