

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, November 18, 2008 – 0530 MST
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (78 new fires)
 New large fires: 2 (*)
 Large fires contained: 1
 Uncontained large fires: 3
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 0
 Fire Use Teams committed: 0

** Uncontained large fires do not include WFU or confine/contain incidents. **

Predictive Services Discussion: Southern California will see cooler temperatures, higher humidity and light winds along the coast today and Wednesday. However, the mountains and inland areas will remain very warm and dry. The Southeast will be dry through Wednesday with gusty winds over Florida today.

Initiate All Actions Based on Current and Expected Fire Behavior

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
 - Post lookouts.
 - Check communications.
 - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.
