Incident Management Situation Report
Thursday, April 9, 2009 – 0800 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (134 new fires)
 New large fires: 2 (*)
 Large fires contained: 4
 Uncontained large fires: 9
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1

Southern Area (PL 2)

New fires: 83
 New large fires: 2
 Uncontained large fires: 8
 Type 2 IMTs committed: 1

2009 Winter Initial Attack, Texas Forest Service. Texas IMT 2 (Hannemann). IMT is supporting multiple fires in west Texas. Acres reported are a cumulative total.

Magic City, Texas Forest Service. Eight miles southwest of Wheeler, TX. Brush and grass. Interior smoldering.

Stuart, Oklahoma DOF. Five miles south of Stuart, OK. Hardwood litter. No further information received.

Turkey Foot, Ouachita NF. Previously reported. Five miles south of Buffalo, OK. Hardwood litter. Minimal fire activity.

864, Texas Forest Service. Started on private land 27 miles northeast of Sonora, TX. Brush and grass. Interior smoldering.

Thatcher Command, Florida DOF. Nine miles southwest of Bartow, FL. Grass. Moderate fire activity.

West Half Bank, Oklahoma DOF. Four miles northwest of Lane, OK. Logging slash and hardwood litter. No new information. Last report unless new information is received.

Poor Mountain, Virginia DOF. One mile northeast of Elliston, VA. Timber. No new information. Last report unless new information is received.

Predictive Services Discussion: A large low pressure system will move across the central and southern Great Plains today producing significant fire potential for portions of New Mexico and west Texas. Precipitation will extend from the Northwest across the central U.S. Marginal to low relative humidity will prevail across much of the East.

Terrain and Fuels Make Escape to Safety Zones Difficult

When fighting wildland fires, it is often easy to get committed to areas that put you in Watchout Situation #17. As firefighters progress along the fireline, it is imperative to constantly keep the following considerations in mind:

- Does the crew's condition allow for fast travel? Discuss physical and mental conditions that could interfere with a crew's ability to travel quickly.
- Will you get adequate warning to make it to your safety zone? Who will you rely on to warn you? How will you ensure that everyone gets the word?
- Can escape routes be improved to make travel to safety zones faster? Are escape routes marked? Review what you have done on past fires to locate, mark, and improve escape routes.
- Will posting more lookouts give adequate warning? Talk about situations where there was more than one firefighter assigned to be lookout.
- To reduce the risks:
 - Consider other tactics that will allow you to be in a safer location. Review fires where you have had to change tactics because escape to safety zones was not adequate.
