Incident Management Situation Report
Friday, April 17, 2009 – 0800 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (190 new fires)
 New large fires: 0 (*)
 Large fires contained: 1
 Uncontained large fires: 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1
[Link](#) to Geographic Area daily reports.

Southern Area (PL 2)

New fires: 45
 New large fires: 0
 Uncontained large fires: 1
 Type 2 IMTs committed: 1

2009 Winter Initial Attack, Texas Forest Service. Texas IMT 2 (Bennett). IMT is supporting multiple fires in west Texas. Acres reported are a cumulative total.

Predictive Services Discussion: A large upper level low pressure system will move into the southern Great Plains today. Precipitation will extend from the Rocky Mountains into eastern Texas. Dry and windy conditions will develop behind the cold front in west Texas and southeast New Mexico. Low relative humidity will encompass much of the East under surface high pressure.

Working with Helicopter Drops

Consider the following questions when you have a helicopter with a bucket working in your area:

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- Are other aircraft in the area?
- Are people on the ground aware of the effects of the helicopter's rotorwash?
- Will terrain and obstructions allow the helicopter to attain the proper drop height?
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
