

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, August 11, 2009 – 0530 MDT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (83 new fires)
New large fires:	4 (*)
Large fires contained:	4
Uncontained large fires : **	34
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	10

Nationally, there are 98 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

A Type 1 Incident Management Team (Molumby) is assigned to the Terrace Mountain fire north of Kelowna, British Columbia, Canada.

Northwest Area (PL 3)

New fires:	11
New large fires:	0
Uncontained large fires:	5
Type 2 IMTs committed:	5

Tiller Complex, Umpqua NF. Transfer of command from IMT2 (Ensley) back to the local unit will occur today. Six miles northeast of Tiller, OR. Timber. Isolated torching and spotting.

Williams Creek, Umpqua NF. IMT2 (Paul). Fifteen miles east of Glide, OR. Timber. Smoldering, creeping and isolated torching. Residences threatened.

Discovery, Okanogan/Wenatchee NF. Washington IMT2 (Gormley). Timber. Thirty miles west of Yakima, WA. Creeping.

North Fork Complex (2 fires), Umatilla NF. IMT2 (Batten). Confine/contain management strategy. Fifteen miles southeast of Ukiah, Oregon. Timber, brush and grass. Creeping and smoldering.

Cougar Ridge Complex, Wallowa-Whitman NF. Transfer of command from IMT2 (Rapp) back to the local unit occurred yesterday. Twelve miles south of Wallowa, OR. Timber. Smoldering.

ABCD July-August, Rogue River NF. IMT2 (Hutton). Eleven miles north of Prospect, OR. Timber with heavy dead and down fuels. Smoldering, creeping and isolated torching. Road closures in effect.

NCS – North Carolina Division of Forestry Resources

Predictive Services Discussion: Hot and dry weather will expand from coast to coast across the southern half of the country, building northward through the Great Basin into the Northern Rockies. Thunderstorms expected across New Mexico and northwest Texas into southern Colorado. Continued cool across Alaska with showers.

Power Line Safety

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential equipment damage or injury:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Don't use right-of-ways as a jump or cargo drop spot.
- Don't drive with long antennas under power lines.
- Don't stand near power lines during retardant drops.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Don't apply straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near, jump clear, don't hang on, keep feet together, and bunny hop away.
