

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, August 16, 2009 – 0530 MDT
National Preparedness Level 3**

National Fire Activity

Initial attack activity: Light (129 new fires)
 New large fires: 0 (*)
 Large fires contained: 2
 Uncontained large fires : ** 19
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 5
 Type 2 IMTs committed: 3

Nationally, there are 101 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

[Link](#) to Geographic Area daily reports.

A Type 1 Incident Management Team (Molumby) is assigned to the Terrace Mountain fire north of Kelowna, British Columbia, Canada. Twenty smokejumpers are assigned to Fort St. John, British Columbia.

Northern California Area (PL 4)

New fires: 22
 New large fires: 0
 Uncontained large fires: 6
 Type 1 IMTs committed 2

Lockheed, San Mateo-Santa Cruz Unit, Cal Fire. Cal Fire IMT1 (Hutchinson). Four miles northwest of Boulder Creek, CA. Timber and brush. Active fire behavior with torching and spotting. Residences threatened. Evacuations in effect.

SHU Lightning (3 fires), Shasta-Trinity Unit, Cal Fire. Cal Fire IMT1 (Wenham). Three miles northeast of Burney, CA. Timber. Smoldering and creeping.

Corral, Santa-Clara Unit, Cal Fire. Eighteen miles east of Pleasanton, CA. Oak, brush and grass. Active fire behavior.

Yuba, Nevada-Yuba Placer Unit, Cal Fire. Three miles northeast of Dobbins, CA. Timber, chaparral and grass. Active fire behavior with torching and spotting. Powerhouse and transmission lines threatened. Communities of Dobbins and Oregon House threatened. Evacuations in effect.

Fire not Scouted and Sized Up

Watchout Situation #1 comes up during initial attack and every time resources arrive at a fire.

● Before taking action on the fire, the following considerations must be addressed:

- Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
- Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
- Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
- Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
- Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)

● Continued from above...

- Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
- Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
- Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)

● To reduce the risks:

- Post lookouts until the fire is sized up and escape routes and safety zones are established.
- Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
