Incident Management Situation Report
Wednesday, August 26, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (83 new fires)
 New large fires: 1 (*)
 Large fires contained: 1
 Uncontained large fires : ** 4
 Area Command Teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 2

Nationally, there are 110 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

[Link](#) to Geographic Area daily reports.

Type 1 Incident Management Team (Molumby) has been released from the Terrace Mountain fire north of Kelowna, British Columbia, Canada. Twenty smokejumpers are assigned to Fort St. John, British Columbia.

Northern California Area (PL 3)

New fires: 10
 New large fires: 0
 Uncontained large fires: 1
 NIMOS committed: 1
 Type 2 IMTs committed: 1

Red Rock, Klamath NF. NIMO (Custer) and IMT2 (Paul). The teams are also managing the Harrington incident. Fifteen miles west of Fort Jones, CA. Timber with heavy dead and down fuels. Backing and creeping fire with isolated torching. Structures threatened.

Harrington, Klamath NF. Confine/contain management strategy. Twenty miles southwest of Happy Camp, CA. Timber litter. Minimal fire activity.

Unburned Fuel Between You And The Fire

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical to direct attack a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- To reduce the risks:
 - Post lookouts
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
