

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, July 11, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (108 new fires)
 New large fires: 4 (*)
 Large fires contained: 2
 Uncontained large fires**: 11
 Area Command Teams committed: 0
 NIMOs committed: 2
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 3

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

Alaska Area (PL 3)

New fires: 5
 New large fires: 1
 Uncontained large fires: 4
 NIMOs committed: 1
 Type 2 IMTs committed: 1

Minto Flat South, Fairbanks Area, Alaska DOF. IMT 2 (Allen). Twelve miles northwest of Nenana, AK. Black spruce and tussock with mixed hardwood litter. Creeping and smoldering with isolated torching. Numerous structures threatened.

Shanta Creek, Kenai – Kodiak Area, Alaska DOF. NIMO (Gage). Started on FWS land twelve miles southeast of Soldotna, AK. Spruce. Active fire behavior.

Rock Slough, Upper Yukon Zone, BLM. Started on FWS land, 47 miles northeast of Fort Yukon, AK. Black spruce, brush and tundra. Creeping and smoldering with isolated torching. Numerous structures threatened.

*** Logging Slash**, Fairbanks Area, Alaska DOF. Twenty-three miles northeast of Nenana, AK. Mixed spruce and hardwood slash. Creeping and smoldering.

BACKFIRING OR BURNOUT OPERATIONS

Backfiring or burnout operations are often critical operations in the fire management job. If planned and executed correctly, they can speed control of a fire and greatly reduce suppression costs. Conversely, if done incorrectly, they can endanger personnel, extend control time and increase cost. Safety considerations must always be given first priority. No backfiring or burnout action, regardless of strategic importance or other critical factors, is worth risking one human life!

- Backfiring or burnout operations must not jeopardize the safety of personnel or equipment or compromise suppression actions on adjacent portions of the fireline.
- One qualified individual must be responsible for controlling and directing the firing operation.
- Before beginning backfiring or burnout operations, assure that:
 - Lookouts are posted.
 - Communications are established with both fireing and holding teams.
 - Escape routes and safety zones are established, known to all resources, and will not be compromised by the firing operations.
- If it is necessary, and time allows, concentrations of fuel adjacent to and inside the control line should be removed.
- Fuel outside the control line may be removed; concentrations of fuel may be scattered, covered with foam or wet down, or treated by ground or aerial retardant applications.
- Critical points such as hooks in the fireline, saddles or canyon may require extra holding forces.
