

**National Interagency Coordination Center
Incident Management Situation Report
Monday, July 13, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (169 new fires)
 New large fires: 3 (*)
 Large fires contained: 3
 Uncontained large fires**: 19
 Area Command Teams committed: 0
 NIMOs committed: 2
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 3

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

SND – Southern Nevada District, BLM

Predictive Services Discussion: Hot and dry weather will persist over Alaska today. Scattered wet thunderstorms are expected over portions of the Northwest, Idaho and Montana. Mixed wet and dry thunderstorms along with gusty winds are on tap for Utah, western Colorado and northern Arizona. Southwest California, Texas and Oklahoma will be hot and dry.

Working with Helicopter Drops

Consider the following questions when you have a helicopter with a bucket working in your area:

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- Are other aircraft in the area?
- Are people on the ground aware of the effects of the helicopter's rotorwash?
- Will terrain and obstructions allow the helicopter to attain the proper drop height?
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
