

**National Interagency Coordination Center
Incident Management Situation Report
Friday, July 17, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (129 new fires)
 New large fires: 6 (*)
 Large fires contained: 4
 Uncontained large fires**: 26
 Area Command Teams committed: 0
 NIMOs committed: 2
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 3

Nationally, there are 43 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

Alaska Area (PL 3)

New fires: 5
 New large fires: 1
 Uncontained large fires: 7
 NIMOs committed: 1
 Type 2 IMTs committed: 1

Railbelt Complex (3 fires), Fairbanks Area, Alaska DOF. IMT 2 (Allen). Twelve miles southwest of Nenana, AK. Black spruce and tussock with mixed hardwood litter. Active fire behavior with group-tree torching. Numerous structures threatened.

Shanta Creek, Kenai – Kodiak Area, Alaska DOF. NIMO (Gage). Started on FWS land twelve miles southeast of Soldotna, AK. Spruce. Moderate fire activity with isolated torching.

Rock Slough, Upper Yukon Zone, BLM. Started on FWS land, forty-seven miles northeast of Fort Yukon, AK. Black spruce, brush and tundra. Creeping and smoldering with isolated torching. Numerous structures threatened.

Logging Slash, Fairbanks Area, Alaska DOF. Twenty-three miles northeast of Nenana, AK. Mixed spruce and hardwood slash. Smoldering.

Upper Healy River, Delta Area, Alaska DOF. Forty-six miles east of Delta Junction, AK. Black spruce and hardwoods. Creeping and smoldering.

Predictive Services Discussion: Hot weather continues today in the Alaska interior with a few thunderstorms. Hot and dry in the West with isolated thunderstorms, some of them dry, over the mountains and deserts of southern California, Great Basin, western Colorado and the Southwest. Texas and Oklahoma will be hot with some thunderstorms in eastern Texas.

Escape

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone. Consider the following during discussion of escape routes and safety zones.

- You should always know the location of your escape routes and safety zones.
- Reassess escape routes throughout the operational period.
 - Has the time you need to escape changed?
 - Is the escape route uphill or down?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
 - If the identified escape routes are compromised, are there other options for escape?
- Time may be critical during an escape. If you realize your escape may be compromised:
 - Drop your line pack and gear because:
 - It is easier to deploy your fire shelter when you're not wearing your line pack.
 - Escape is quicker.
 - Your line pack may contain fusees or saw gas.
 - Take your fire shelter with you.
 - Face and neck shrouds offer additional protection against radiant heat.
- Stay alert for changing conditions that may indicate a need for you to speed up your escape or to deploy your fire shelter. Conditions can change very quickly. Be alert for:
 - Increases in wind or smoke
 - Change in wind direction
 - Increases in temperature
 - Embers blowing past you
 - Spot fires forming near you
- If it becomes apparent that you are not going to reach a safety zone, it may be time to deploy your fire shelter. Remember:
 - Be alert for possible shelter deployment areas as you move.
 - Firefighters need to decide whether to continue escaping or to deploy their fire shelters.
 - Give yourself ample time to deploy before the heat and flames arrive.
