

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 19, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (131 new fires)
 New large fires: 7 (*)
 Large fires contained: 3
 Uncontained large fires**: 18
 Area Command Teams committed: 0
 NIMOs committed: 2
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 4

Nationally, there are 41 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

UPD – Uncompahgre Field Office, BLM

Predictive Services Discussion: Cooler conditions will move into the northwest quarter of the country today. Winds will increase across Washington and the Northern Rockies. Initially dry thunderstorms are possible from eastern Oregon and the Sierras of California to the Continental Divide, with wetter storms east of the Divide. Alaska will continue to see cool, wet conditions in the southwest with warm temperatures and the threat for thunderstorms across the interior.

Entrapment Avoidance (Cont...)

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

- Discuss the three types of safety zones and describe examples.
 - The burn
 - Natural features
 - Constructed sites
- Discuss the guidelines for distance separation to avoid radiant heat injury.
 - Four times the maximum flame height (20 feet-flame height x 4 = 80 feet radius from firefighters)
- Discuss heat impact factors that will affect the guidelines for distance separation.
 - Convection heat from wind and terrain features
 - Location relative to fire spread
 - Reburn potential of fuel in safety zone
- Discuss that firefighters have a right to know the location of their escape routes and safety zones at all times.
- Discuss that firefighter have a right to ask for clarification when faced with unclear instructions or fear of the unknown.
- Describe a basic procedure for identification of effective escape routes and safety zones.
 - Observe
 - Visualize
 - Identify
 - Time
 - Inform
 - Evaluate
