EVP – Everglades National Park

Predictive Services Discussion: Scattered wet thunderstorms will continue today from the Sierras and Cascades eastward across the Great Basin to the Rockies. The Southwest Area will be warmer, drier and breezy with a few thunderstorms in the northern portions of Arizona and New Mexico. Much of the Alaska interior will be warmer and drier with cool, showery weather in the west. Gusty winds are expected over the north slopes of the Alaska Range.

Aviation "Watch Out" Situations

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

- Is the flight necessary?
- Who is in charge?
- Are all hazards identified and have you made them known?
- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
 - Communications
 - Confusion
 - Personnel
 - Weather
 - Turbulence
 - Conflicting priorities
- Is there a better way to do it?
- Are you driven by the task and sense of urgency?
- Can you justify your actions?
- Are there other aircraft in the area?
- Will the pilot accept the mission?
- Are any guidelines being ignored or policies being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?
