Incident Management Situation Report
Wednesday, June 3, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (115 new fires)
 New large fires: 2 (*)
 Large fires contained: 0
 Uncontained large fires: 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1

** Uncontained large fires do not include confine/contain incidents. **

Southwest Area (PL 2)

New fires: 8
 New large fires: 2
 Uncontained large fires: 1

Melendrez Pass, Coronado NF. Confine / contain management strategy. Ten miles east of Green Valley, AZ. Brush and grass. Moderate fire activity. Last report unless significant activity occurs.

Four Mile, San Carlos Agency, BIA. Fourteen miles northwest of Granville, AZ. Juniper and grass. Smoldering.

Skeleton, Coronado NF. Confine / contain management strategy. Twenty five miles southwest of Animas, NM. Brush and grass. Minimal fire activity. Last report unless significant activity occurs.

Diamond, Gila NF. Confine / contain management strategy. Forty-five miles northeast of Silver City, NM. Grass. Moderate fire activity. Last report unless significant activity occurs.

Ruby, Kaibab NF. Confine / contain management strategy. Twelve miles southeast of Grand Canyon Village, AZ. Timber litter and understory. Minimal fire activity. Last report unless significant activity occurs.

Predictive Services Discussion: Eastern and south-central Alaska will be warmer and drier today with cool, showery weather in the west. Gusty winds are expected over the north slopes of the Alaska Range. The Southwest Area will be warmer, drier with breezy winds in western Arizona. Scattered wet thunderstorms are expected in eastern New Mexico as well as portions of California, Oregon and the Great Basin.

Common Denominators of Fire Behavior on Tragedy Fires

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

- Most incidents happen on smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mopup stage.
- Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.
- Some suppression tools, such as helicopters or airtankers, can adversely affect fire behavior. The blasts of air from low-flying helicopters and airtankers have been known to cause flare-ups.
