

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 7, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (75 new fires)
 New large fires: 0 (*)
 Large fires contained: 0
 Uncontained large fires: 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires do not include confine/contain incidents. **

Southwest Area (PL 2)

New fires: 12
 New large fires: 0
 Uncontained large fires: 1

Diamond, Gila NF. Previously reported confine / contain management strategy. Forty-five miles northeast of Silver City, NM. Grass and timber understory. Moderate fire activity. Last report unless significant activity occurs.

Willow, Gila NF. Previously reported confine / contain management strategy. Fourteen miles northeast of Reserve, NM. Hardwood litter. Moderate fire activity. Last report unless significant activity occurs.

Meason, Gila NF. Confine / contain management strategy, Twenty six miles north of Mimbres, NM. Hardwood litter. Active fire behavior with spotting. Last report unless significant activity occurs.

Pioneer, Tonto NF. Eight miles south of Globe, AZ. Hardwood litter and chaparral. Moderate fire activity.

Aviation Communications

Discuss the following information in terms of effective communication with aircraft.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to.
- Do not use local slang.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Know what you want to say before you key the microphone.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- Give only meaningful information on the radio.
- Give accurate and descriptive ground information when describing a specific place on the ground.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
