

**National Interagency Coordination Center
Incident Management Situation Report
Friday, June 12, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (70 new fires)
 New large fires: 3 (*)
 Large fires contained: 0
 Uncontained large fires: 8
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 2

** Uncontained large fires do not include confine/contain incidents. **

Southwest Area (PL 2)

New fires: 10
 New large fires: 2
 Uncontained large fires: 4
 Type 2 IMTs committed: 2

Pioneer, Tonto NF. IMT 2 (Sciacca). Eight miles south of Globe, AZ. Chaparral. Minimal fire activity.

Diamond, Gila NF. IMT 2 (McBratney). IMT also managing the Meason fire. Previously reported confine / contain incident. Forty-five miles northeast of Silver City, NM. Grass and timber understory. Moderate fire activity.

Meason, Gila NF. Confine / contain management strategy. Twenty-six miles north of Mimbres, NM. Hardwood litter. Flanking and surface fire.

Cato, Roswell Field Office, BLM. Forty-five miles east of Roswell, NM. Grass. Active fire behavior. Residences threatened. Increase in acreage due to more accurate mapping.

Pasco, Socorro District, New Mexico State Forestry. Forty-two miles south of Animas, NM. Brush and Grass. Active fire behavior. Residences threatened.

Lochiel, Coronado NF. Fifteen miles south of Patagonia, AZ. Grass. Active fire behavior. Residences threatened.

Alaska Area (PL 2)

New fires: 6
New large fires: 1
Uncontained large fires: 3

Tonclonukna Creek, Southwest Area, Alaska DOF. Seven miles south of Telida, AK. Black spruce and tundra. Running, torching, and continuous crown fire. Residences threatened.

Ladue, Tok Area, Alaska DOF. Sixteen miles north of Northway, AK. Spruce. Residences threatened. No further information received.

Dillinger, Southwest Area, Alaska DOF. Twelve miles northeast of Farewell, AK. Mixed spruce and tundra. Active fire behavior with torching and spotting.

Predictive Services Discussion: The interior of Alaska will be mostly cloudy today with a chance of showers and thunderstorms. Windy, warm and dry conditions are expected across the southern portions of Arizona and New Mexico, as well as west Texas. Scattered thunderstorms are expected across much of the rest of the West.

Escape

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone. Consider the following during discussion of escape routes and safety zones.

- You should always know the location of your escape routes and safety zones.
- Reassess escape routes throughout the operational period.
 - Has the time you need to escape changed?
 - Is the escape route uphill or down?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
 - If the identified escape routes are compromised, are there other options for escape?
- Time may be critical during an escape. If you realize your escape may be compromised:
 - Drop your line pack and gear because:
 - It is easier to deploy your fire shelter when you're not wearing your line pack.
 - Escape is quicker.
 - Your line pack may contain fusees or saw gas.
 - Take your fire shelter with you.
 - Face and neck shrouds offer additional protection against radiant heat.
- Stay alert for changing conditions that may indicate a need for you to speed up your escape or to deploy your fire shelter. Conditions can change very quickly. Be alert for:
 - Increases in wind or smoke
 - Change in wind direction
 - Increases in temperature
 - Embers blowing past you
 - Spot fires forming near you
- If it becomes apparent that you are not going to reach a safety zone, it may be time to deploy your fire shelter. Remember:
 - Be alert for possible shelter deployment areas as you move.
 - Firefighters need to decide whether to continue escaping or to deploy their fire shelters.
 - Give yourself ample time to deploy before the heat and flames arrive.
