

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 16, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (97 new fires)
 New large fires: 0 (*)
 Large fires contained: 2
 Uncontained large fires: 6
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1

** Uncontained large fires do not include confine/contain incidents. **

Southwest Area (PL 3)

New fires: 18
 New large fires: 0
 Uncontained large fires: 4
 Type 2 IMTs committed: 1

Diamond, Gila NF. IMT 2 (McBratney). IMT also managing the Meason fire. Confine / contain management strategy. Forty-five miles northeast of Silver City, NM. Grass. Moderate fire activity.

Meason, Gila NF. Confine / contain management strategy. Twenty-six miles north of Mimbres, NM. Hardwood litter. Moderate fire activity.

Pasco, Socorro District, New Mexico State Forestry. Forty-two miles south of Animas, NM. Brush and grass. No new information.

Elk Horn, Tucson District, Arizona State Forestry. Twenty-six miles southwest of Three Points, AZ. Brush and grass. Moderate fire behavior. Residences threatened.

Pioneer, Tonto NF. Eight miles south of Globe, AZ. Chaparral. Moderate fire activity.

Little Alamo, Coronado NF. Five miles west of Nogales, AZ. Grass. No new information.

FLS – Florida DOF.

Predictive Services Discussion: Warmer and drier weather is on tap for the Alaska interior today along with a chance of showers and thunderstorms. It will be dry and breezy over most of the Southwest with scattered thunderstorms over west Texas. Scattered thundershowers continue over much of the rest of the West.

Backfiring or Burnout Operations

Backfiring or burnout operations are often critical operations in the fire management job. If planned and executed correctly, they can speed control of a fire and greatly reduce suppression costs. Conversely, if done incorrectly, they can endanger personnel, extend control time and increase cost. Safety considerations must always be given first priority. No backfiring or burnout action, regardless of strategic importance or other critical factors, is worth risking one human life!

- Backfiring or burnout operations must not jeopardize the safety of personnel or equipment or compromise suppression actions on adjacent portions of the fireline.
- One qualified individual must be responsible for controlling and directing the firing operation.
- Before beginning backfiring or burnout operations, assure that:
 - Lookouts are posted.
 - Communications are established with both firing and holding teams.
 - Escape routes and safety zones are established, known to all resources, and will not be compromised by the firing operations.
- If it is necessary, and time allows, concentrations of fuel adjacent to and inside the control line should be removed.
- Fuel outside the control line may be removed; concentrations of fuel may be scattered, covered with foam or wet down, or treated by ground or aerial retardant applications.
- Critical points such as hooks in the fireline, saddles or canyon may require extra holding forces.
