

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, March 10, 2009 – 0800 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Heavy (499 new fires)
New large fires:	8 (*)
Large fires contained:	6
Uncontained large fires:	18
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1
Fire Use Teams committed:	0

** Uncontained large fires do not include WFU or confine/contain incidents. **

[Link](#) to Geographic Area daily reports.

The U.S. has mobilized three Burned Area Emergency Response teams, one 20-person suppression crew and 15 fire specialists and managers to Australia.

Southern Area (PL 2)

New fires:	345
New large fires:	7
Uncontained large fires:	17
Type 2 IMTs committed:	1

2009 Winter Initial Attack, Texas Forest Service. Texas IMT 2 (Bennett). IMT is supporting multiple fires in west Texas. Acres reported are a cumulative total.

Putnam, Oklahoma DOF. One mile north of Putman, OK. Grass. No further information received.

Francis, Okmulgee Field Office, BIA. Started on private land three miles northeast of Bristow, OK. Timber and grass. Creeping and smoldering.

Targa, Sabine National Wildlife Refuge, FWS. Twelve miles southeast of Hackberry, LA. Grass. Smoldering.

Telamay Hollow, Oklahoma DOF. Five miles east of Moodys, OK. Logging slash. No further information received.

Deep Fork, Okmulgee Field Office, BIA. Four miles south of Gypsy, OK. Hardwood litter and grass. Smoldering.

Wilderness Ridge, Texas Forest Service. Started on private land thirty-three miles southeast of Austin, TX. Brush and grass. Minimal fire activity.

Cameron Meadows, Sabine National Wildlife Refuge. Twelve miles southeast of Hackberry, LA. Grass. Moderate fire behavior.

Loma del Norte, Texas Forest Service. Started on private land eight miles south of Alpine, TX. Brush and grass. Minimal fire behavior.

Coal Creek, Texas Forest Service. Started on private land twenty-three miles northwest of Bandera, TX. Brush and grass. Active fire behavior. Residences threatened. Evacuations in affect.

Tulley, Oklahoma DOF. Six miles east of Proctor, OK. Hardwood litter. No further information received.

Wizard, Texas Forest Service. Started on private land two miles north of Wizard Wells, TX. Grass. Active fire behavior. Structures threatened.

Polar, Texas Forest Service. Started on private land twenty-eight miles southeast of Post, TX. Juniper and grass. Active fire behavior with single-tree torching.

Thompson House, Oklahoma DOF. Five miles east of Moodys, OK. Hardwood litter. No further information received.

Tuscola, Texas Forest Service. Started on private land fifteen miles south of Abilene, TX. Brush and grass. Minimal fire behavior. Structures threatened.

Sandyhill, Texas Forest Service. Started on private land thirty-seven miles northwest of Houston, TX. Timber, brush and grass. Active fire behavior with spotting.

Sweetwater Creek, National Forests in Mississippi. Five miles south of New Augusta, MS. Timber and grass. No further information received.

Vehicle Entrapment

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Fire out around the vehicle if there is time.
- Park behind a natural barrier or structure.
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles or draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway, remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
 - Temperatures may reach over 200 degrees Fahrenheit.
 - Smoke and sparks may enter the vehicle.
 - Plastic parts may start to melt and give off toxic gases.
 - Windows may start to crack.
 - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
 - Each crewmember should cover himself/herself with a fire shelter.
 - Exit the vehicle from the side away from the greatest heat.
 - Stay together and get as low to the ground as possible, moving away from the vehicle.
 - Deploy your shelter in a safe area.
