Incident Management Situation Report
Friday, May 8, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (89 new fires)
 New large fires: 0 (*)
 Large fires contained: 0
 Uncontained large fires: 4
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

** Uncontained large fires do not include confine/contain incidents. **

Predictive Services Discussion: Gusty northerly winds and dry conditions will continue across the south-central coast and mountains of Southern California. Dry and breezy conditions are expected today across portions of the Southwest. Precipitation will continue to linger along a cold front extending from the Northeast to Tennessee Valley. Another storm system will move across the Northern Rockies and Rocky Mountain Areas.

Escape

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone. Consider the following during discussion of escape routes and safety zones.

- You should always know the location of your escape routes and safety zones.
- Reassess escape routes throughout the operational period.
 - Has the time you need to escape changed?
 - Is the escape route uphill or down?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
 - If the identified escape routes are compromised, are there other options for escape?
- Time may be critical during an escape. If you realize your escape may be compromised:
 - Drop your line pack and gear because:
 - It is easier to deploy your fire shelter when you're not wearing your line pack.
 - Escape is quicker.
 - Your line pack may contain fusees or saw gas.
 - Take your fire shelter with you.
 - Face and neck shrouds offer additional protection against radiant heat.
- Stay alert for changing conditions that may indicate a need for you to speed up your escape or to deploy your fire shelter. Conditions can change very quickly. Be alert for:
 - Increases in wind or smoke
 - Change in wind direction
 - Increases in temperature
 - Embers blowing past you
 - Spot fires forming near you
- If it becomes apparent that you are not going to reach a safety zone, it may be time to deploy your fire shelter. Remember:
 - Be alert for possible shelter deployment areas as you move.
 - Firefighters need to decide whether to continue escaping or to deploy their fire shelters.
 - Give yourself ample time to deploy before the heat and flames arrive.
