

**National Interagency Coordination Center
Incident Management Situation Report
Monday, May 18, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (86 new fires)
 New large fires: 0 (*)
 Large fires contained: 1
 Uncontained large fires: 9
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 2

** Uncontained large fires do not include confine/contain incidents. **

[Link](#) to Geographic Area daily reports.

Southern Area (PL 2)

New fires: 15
 New large fires: 0
 Uncontained large fires: 7
 Type 2 IMT's committed: 2

Orlando-Volusia Complex, Florida DOF. Florida IMT 2 (Utley). Ten miles northeast of Chuluota, FL. Southern rough. Moderate fire behavior with torching and short-range spotting.

Jeff Davis Complex, Texas Forest Service. Texas IMT 2 (Bennett). IMT is also managing the Musgrave Canyon fire. Twenty miles north of Alpine, TX. Brush and grass. No further information received.

Musgrave Canyon, Texas Forest Service. Seventeen miles southwest of Valentine, TX. Brush and grass. No further information received.

Bomb, Florida DOF. Twelve miles northeast of Sebring, FL. Southern rough. No further information received.

Indian Trail, Florida DOF. Two miles northeast of Indiantown, FL. Southern rough. Smoldering.

Lincoln Park, Florida DOF. Two miles northeast of Indiantown, FL. Southern rough. No further information received.

Green Farm, Florida DOF. Ten miles northeast of Indiantown, FL. Southern rough. Smoldering.

KKS – Kenai-Kodiak Area Forestry, Alaska DOF

Predictive Services Discussion: Some dry thunderstorms are expected over Arizona today with wetter thunderstorms over New Mexico. Otherwise, Southern California, Arizona, New Mexico and west Texas will be hot and dry. Florida will see scattered thundershowers. The south-central and interior portions of Alaska will be warm with very low humidity.

Proper Use of Trigger Points

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of firefighters. Keeping an eye out for the 18-Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of support resources (airtankers, helicopters, etc.)
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, etc.)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is appropriate. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan
