

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, May 23, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (136 new fires)
New large fires: 0 (*)
Large fires contained: 0
Uncontained large fires: 3
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0

** Uncontained large fires do not include confine/contain incidents. **

Blockhouse	WI	CNF	112	---	75	5/22	30	---	0	4	1	6	NR	FS

Predictive Services Discussion: Wet conditions will continue across much of the Southwest. Moisture will continue to move northward covering much of the West with a chance of thunderstorms. Isolated dry thunderstorms are possible across western Nevada, the Sierra Nevada of California, and into southern Idaho. Relative humidity will increase with scattered showers across portions of the Great Lakes and the Northeast.

Responding to Vehicle Fires

Suppression of vehicle fires is extremely dangerous and poses many health hazards to firefighters. The following procedures are recommended:

- Secure the scene and provide or request assistance for traffic control.
- Provide for your escape route at the scene.
- Do not use road flares if fuel is leaking from the vehicle or if wildland fuel is nearby.
- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatuses (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-feet minimum), and avoid contact with vehicle fire smoke or fumes.
