National Interagency Coordination Center
Incident Management Situation Report
Monday, November 9, 2009 – 0800 MT
National Preparedness Level 1

National Fire Activity

Initial attack activity:	Light (35 new fires)
New large fires:	4 (*)
Large fires contained:	3
Uncontained large fires : **	3
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

Nationally, there are 20 large fires being managed with minimal or no resource commitment that are not shown on today's report.
** Uncontained large fires do not include confine/contain and resource benefit incidents.
Link to Geographic Area daily reports.

Southwest Area (PL 2)

New fires:	0
New large fires:	0
Uncontained large fires:	1
Type 1 IMTs committed:	1

Reno, Apache-Sitgreaves NF. IMT 1 (Hughes). Confine/contain management strategy. Twenty-three miles southwest of Alpine, AZ. Pine and mixed conifer. Backing fire.

Number 5, Mescalero Agency, BIA. Five miles southeast of Ruidoso, NM. Grass. No new information.

KYS – Kentucky DOF CNF – Cherokee NF

Predictive Services Discussion: Arizona, southern California and the Appalachians will have warm temperatures, low humidity and generally light winds today. High humidity is on tap for Florida with a chance of showers developing late in the day.

Link to Predictive Services Outlook products.

Today's discussion is from the Weather / Fire Behavior Category.

BASE ALL ACTIONS ON CURRENT AND EXPECTED FIRE BEHAVIOR

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
    - Post lookouts.
    - Check communications.
    - Retreat if you have doubts about your escape routes or safety zones or it the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.

How would you judge the fire season? (Above normal, below, or average.)
