

**National Interagency Coordination Center
Incident Management Situation Report
Friday, November 13, 2009 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (108 new fires)
 New large fires: 1 (*)
 Large fires contained: 1
 Uncontained large fires : ** 0
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 0

Nationally, there are 20 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents.

[Link](#) to Geographic Area daily reports.

This will be the last daily Incident Management Situation Report. This report will be posted every Friday at 0800 Mountain Time unless significant activity occurs.

Southwest Area (PL 2)

New fires: 15
 New large fires: 0
 Uncontained large fires: 0
 Type 1 IMTs committed: 1

Reno, Apache-Sitgreaves NF. IMT 1 (Hughes). Confine/contain management strategy. Twenty-three miles southwest of Alpine, AZ. Pine and mixed conifer. Minimal fire activity. This will be the last report unless significant activity occurs.

Predictive Services Discussion: Arizona and western New Mexico will be warm and dry today. Southern California should be a little cooler with slightly higher humidity. Most of the Southeast will have high humidity with rain from Florida to Virginia.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
Entrapment Category.

Vehicle Entrapment

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Fire out around the vehicle if there is time.
- Park behind a natural barrier or structure.
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles or draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway; remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
 - Temperatures may reach over 200 degrees Fahrenheit.
 - Smoke and sparks may enter the vehicle.
 - Plastic parts may start to melt and give off toxic gases.
 - Windows may start to crack.
 - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
 - Each crewmember should cover him/herself with a fire shelter.
 - Exit the vehicle from the side away from the greatest heat.
 - Stay together and get as low to the ground as possible, moving away from the vehicle.
 - Deploy your shelter in a safe area.
