

**National Interagency Coordination Center
Incident Management Situation Report
Monday, October 26, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (10 new fires)
 New large fires: 1 (*)
 Large fires contained: 0
 Uncontained large fires : ** 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

Nationally, there are 48 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents.

Predictive Services Discussion: Offshore winds across the mountains and south coast of southern California will bring an increase in fire potential this morning in combination with warm and dry conditions that have been in place over the area for several days. A cold front will turn the flow onshore by tonight and bring much cooler conditions. A low pressure system moving into the northwest quarter of the country will bring widespread cooling and scattered precipitation today.

**Today's discussion is from the
Hazard Tree Category.**

Hazard Tree – Risk Management Situational Awareness/ Hazard Assessment

● Environment:

- Existing winds and forecast
- Night operations
- Steep slopes
- Diseased or bug-kill areas
- Number, density, and height of hazard trees
- Anticipated burn-down time
- Potential for domino effect to surrounding trees
- Maintain situational awareness and continually reassess hazards

● Note: In addition to suppression and mop-up operations, assess, control, and monitor hazard trees along roads and when selecting break areas or campsites.

● Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment
- Avoid hazards by designating "No Work Zones" (NWZ) – (flag, sign, and map)
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area
- Post lookouts to help maintain secure area
- Fire proof potential hazard trees to prevent ignition
- Initiate road/traffic control and area closure
- Keep clear of bucket drops near trees/snags
- Establish trigger points for reposition to secure areas in response to high winds
