

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 26, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (75 new fires)
 New large fires: 2 (*)
 Large fires contained: 0
 Uncontained large fires : ** 8
 Area Command Teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

Nationally, there are 62 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents.

Northwest Area (PL 2)

New fires: 6
 New large fires: 0
 Uncontained large fires: 2
 NIMOs committed: 1
 Type 2 IMTs committed: 1

Boze, Umpqua NF. NIMO (Cable). Nine miles southwest of Toketee Falls, OR. Timber. Creeping and smoldering.

Tumblebug Complex, Willamette NF. IMT 2 (Ensley). Twenty-three miles southeast of Oakridge, OR. Timber. Running fire with group-tree torching and short-range spotting.

Incident Name	St	Unit	Size	Size Chge 24 Hrs	% Ctn	Est Ctn	Totl Pers	Pers Chge 24 Hrs	Crw	Eng	Heli	Strc Lost	\$\$ CTD	Origin Own

Northern Rockies Area (PL 2)

New fires: 9
 New large fires: 0
 Uncontained large fires: 2

Saddle Mtn 2, Flathead Agency, BIA. Four miles west of Arlee, MT. Timber and logging slash. Moderate fire activity with torching.

Copper Creek, Southwestern Land Office, Montana Department of Land and Resources. Four miles east of Lincoln, MT. Timber and grass. Smoldering with isolated torching.

Arnica, Yellowstone National Park, NPS. Previously reported confine/contain incident. Five miles west of Bridge Bay, WY. Lodgepole pine. Active fire behavior with crowning and long-range spotting.

Table Mountain, Beaverhead/Deerlodge NF. Previously reported confine/contain incident. Twenty-three miles southwest of Philipsburg, MT. Timber. Creeping fire with torching and spotting.

Predictive Services Discussion: High pressure continuing to strengthen along the west coast will cause near record heat and very dry conditions across California will spread north into Oregon. At the same time, low pressure dropping southeast towards the northern Great Plains will bring windy and dry conditions to northern Idaho and much of Montana. Elevated fire potential due to hot and dry conditions will continue Sunday across California and parts of Oregon, while fire potential will decrease across much of Montana and northern Idaho due to weakening winds and increasing humidity.

Backfiring or Burnout Operations

Backfiring or burnout operations are often critical operations in the fire management job. If planned and executed correctly, they can speed control of a fire and greatly reduce suppression costs. Conversely, if done incorrectly, they can endanger personnel, extend control time and increase cost. Safety considerations must always be given first priority. No backfiring or burnout action, regardless of strategic importance or other critical factors, is worth risking one human life!

- Backfiring or burnout operations must not jeopardize the safety of personnel or equipment or compromise suppression actions on adjacent portions of the fireline.
- One qualified individual must be responsible for controlling and directing the firing operation.
- Before beginning backfiring or burnout operations, assure that:
 - Lookouts are posted.
 - Communications are established with both firing and holding teams.
 - Escape routes and safety zones are established, known to all resources, and will not be compromised by the firing operations.
- If it is necessary, and time allows, concentrations of fuel adjacent to and inside the control line should be removed.
- Fuel outside the control line may be removed; concentrations of fuel may be scattered, covered with foam or wet down, or treated by ground or aerial retardant applications.
- Critical points such as hooks in the fireline, saddles or canyon may require extra holding forces.
