

**National Interagency Coordination Center
Incident Management Situation Report
Monday, September 28, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (59 new fires)
 New large fires: 8 (*)
 Large fires contained: 3
 Uncontained large fires : ** 9
 Area Command Teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 3

Nationally, there are 54 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents.

[Link](#) to Geographic Area daily reports.

Northwest Area (PL 2)

New fires: 3
 New large fires: 1
 Uncontained large fires: 2
 NIMOs committed: 1
 Type 2 IMTs committed: 1

Boze, Umpqua NF. NIMO (Cable). Nine miles southwest of Toketee Falls, OR. Timber. Moderate fire activity with isolated torching.

Tumblebug Complex, Willamette NF. IMT 2 (Ensley). Twenty-three miles southeast of Oakridge, OR. Timber. Running fire with torching and spotting.

* **Twin Peaks**, Okanogan/Wenatchee NF. Confine/contain management strategy. Twenty miles west of Naches, WA. Timber. No further information received. Last report unless significant activity occurs.

Incident Name	St	Unit	Size	Size Chge 24 Hrs	% Ctn	Est Ctn	Totl Pers	Pers Chge 24 Hrs	Crw	Eng	Heli	Strc Lost	\$\$ CTD	Origin Own

Northern Rockies Area (PL 3)

New fires: 16
New large fires: 4
Uncontained large fires: 4
Type 2 IMTs committed 1

MacDonald Pass, Helena NF. IMT2 (Secrest). Eight miles west of Helena, MT. Timber. Residences threatened. No further information received.

* **Baldy**, Flathead NF. Three miles west of Lakeside, MT. Timber, brush and grass. Active fire behavior. Community of Lakeside threatened. Road closures in effect.

Kootenai Creek, Bitterroot NF. Seven miles northwest of Stevensville, MT. Timber. Creeping, smoldering and torching.

Arnica, Yellowstone National Park, NPS. Previously reported confine/contain incident. Five miles west of Bridge Bay, WY. Lodgepole pine. Active fire behavior with crowning and long-range spotting. Last report unless significant activity occurs.

* **North Butte**, Northern Cheyenne Agency, BIA. Nine miles west of Lame Deer, MT. Timber. Moderate fire activity.

Table Mountain, Beaverhead/Deerlodge NF. Previously reported confine/contain incident. Twenty-three miles southwest of Philipsburg, MT. Timber. Running fire with single tree torching. Residences threatened. Last report unless significant activity occurs.

* **Ninko Creek**, Flathead NF. Sixteen miles northwest of Polebridge, MT. Timber. Moderate fire activity with torching.

Lily Lake, Beaverhead/Deerlodge NF. Previously reported confine/contain incident. Ten miles northeast of Wisdom, MT. Timber. Active fire behavior with torching and short crown runs. Last report unless significant activity occurs.

Saddle Mtn 2, Flathead Agency, BIA. Four miles west of Arlee, MT. Timber and logging slash. Moderate fire activity.

NWS – Nevada Division of Forestry

Predictive Services Discussion: Increasing southwest winds in advance of a low pressure system approaching the northwest coast today will bring elevated fire potential to portions of northeast California, Oregon and southwest Idaho due to windy and dry conditions. The eastward progression of this system on Tuesday will bring decreasing fire potential to this same area, as well as western Montana, due to cooler temperatures and a chance for showers, while shifting the windy and dry conditions to portions of Utah and Arizona. Fire potential will decrease both today and Tuesday across southern California due to cooler and more humid conditions associated with the onshore flow.

PROPER USE OF TRIGGER POINTS

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of firefighters. Keeping an eye out for the 18-Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of support resources (airtankers, helicopters, etc.)
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, etc.)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is appropriate. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan
