

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, July 8, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (123 new fires)
 New large fires: 1 (*)
 Large fires contained: 0
 Uncontained large fires: ** 6
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1

Nationally, there are 48 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy. **

[Link](#) to Geographic Area daily reports.

Interagency personnel are assigned to a number of locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- Support to the Fish and Wildlife Service include these areas: Delta, Breton and Bon Secour National Wildlife Refuges, as well as Houma, LA and Mobile, AL.

- Support to the National Park Service include these areas: Gulf Islands National Seashore, Jean Lafitte Park and Preserve, Everglades National Park, Dry Tortugas, Biscayne National Park, De Soto National Memorial and Big Cypress National Preserve.

Alaska Area (PL 3)

New fires: 3
New large fires: 0
Uncontained large fires: 5

Louie Creek, Galena Zone, BLM. Started on private land eight miles southwest of Huslia, AK. Black spruce and mixed hardwoods. Creeping and smoldering with isolated single tree torching. Structures threatened.

Eli River, Galena Zone, BLM. Started on National Park Service land thirteen miles northeast of Noatak, AK. Tundra. Active fire behavior.

Pat Creek, Upper Yukon Zone, BLM. Fifteen miles north of Stevens Village, AK. Black spruce and tundra. Moderate fire activity with isolated group torching.

Fiasco Lake, Upper Yukon Zone, BLM. Ten miles north of Circle City, AK. Black spruce and brush. Interior smoldering.

Jade Mountain, Galena Zone, BLM. Thirteen miles northeast of Noatak, AK. Spruce and brush. Smoldering. Residences threatened.

Predictive Services Discussion: Thunderstorm activity will be increasing and spreading northward today. A mixture of wet and dry thunderstorms is expected over Oregon, northern California, the Sierras, Great Basin and western Colorado. Thunderstorms will also be increasing over the Southwest with drier storms in northwest Arizona. It will be very warm across the West, particularly in the Northwest and Great Basin. Warmer and drier weather is on tap for the northern Interior of Alaska along with some dry lightning.

**Today's discussion is from the
Aviation Category.**

HELICOPTER PERFORMANCE AND EFFECTIVENESS

Certain helicopter missions push the limits of the aircraft's performance capabilities. Items that reduce the effectiveness and increase the risk of the mission include weight, temperature, altitude, and visibility.

- Helicopter missions that transport external loads increase risk.
- Helicopters performance/lift capabilities decrease as temperature and/or altitude increase. Be watchful of conditions that are High, Hot and Heavy!
- All helicopters have different maximum performance capabilities, so be aware of the capabilities of the specific helicopter that you are working with.
- Low-level helicopter operations often occur in heavy smoke where hazards (e.g., trees, snags, antennas, visibility, turbulence, and other aircraft) increase the risk level significantly.
- Determine the risk level for every mission. Is the risk level acceptable? Can the risk be mitigated? If the risk is not acceptable or it cannot be mitigated, then the mission should not be flown.
- A large part of the success of a helicopter mission is the result of good communications between the pilot and the user on the ground.
- Accurate target and hazard descriptions are essential to a safe mission. Locate this information and relay it to the pilot. Things to consider in the target description include:
 - Have you considered what the target would look like from the air?
 - Are you located where the pilot can see you?
 - Do you have a signal mirror?
 - Are you using cardinal directions or clock directions in relation to the track of the aircraft?
 - What is the wind direction? Provide this information to the pilot.
 - Are all firefighters clear of the drop area?
 - Is there a safer way to carry out an effective suppression action?
