

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 1, 2010 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (91 new fires)
New large fires:	2 (*)
Large fires contained:	1
Uncontained large fires: **	7
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Nationally, there are 26 large fires being managed to achieve multiple objectives.

** Uncontained large fires includes only fires being managed under a full suppression strategy.**

[Link](#) to Geographic Area daily reports.

Department of Interior personnel are assigned to several locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- A total of 329 Fish and Wildlife Service personnel are assigned to Delta, Breton and Bon Secour National Wildlife Refuges, as well as Houma, LA and Mobile, AL.
- A total of 205 National Park Service personnel are assigned to Gulf Islands National Seashore, Jean Lafitte Park and Preserve, Everglades National Park, Dry Tortugas, Biscayne National Park, De Soto National Memorial and Big Cypress National Preserve.

Alaska Area (PL 4)

New fires:	11
New large fires:	1
Uncontained large fires:	4
Type 2 IMTs committed:	2

Eagle Trail, Tok Area Forestry, Alaska DOF. IMT 2 (Allen). One mile south of Tanacross, AK. Spruce. Active fire behavior with spotting, running and group torching. Village of Tanacross threatened. Traffic delays along Alaska Highway.

Gilles Creek, Delta Area Forestry, Alaska DOF. IMT2 (Paul). Limited perimeter control incident. Twenty miles north of Delta, AK. Dormant brush, slash and black spruce. Moderate fire behavior with isolated group torching. Numerous structures threatened.

Toklat, Tanana Zone, BLM. Limited perimeter control incident. Started on state land 25 miles southwest of Nenana, AK. Black spruce and tundra. Moderate fire activity. Residences and outbuildings threatened.

* **Eklutna**, Mat-Su Area, Alaska DOF. Thirty-seven miles northeast of Anchorage, AK. Timber and grass. Active fire behavior.

Cascaden Ridge, Tanana Zone, BLM. Previously reported limited perimeter control incident. Twelve miles southwest of Livengood, AK. Dormant brush, slash and black spruce. Active fire behavior with isolated torching. Structures and outbuildings threatened. Last report unless significant activity occurs.

Turquoise Lake, Southwest Area Forestry, Alaska DOF. Confine/contain incident. Fifteen miles southwest of Farewell, AK. Black spruce. Active fire behavior. Residences threatened. Last report unless significant activity occurs.

Applegate, Tanana Zone, BLM. Started on State land 25 miles northeast of Manley Hot Springs, AK. Dormant brush, slash and black spruce. Active fire behavior with group-tree torching and spotting. Numerous structures threatened.

Lone Mountain, Southwest Area Forestry, Alaska DOF. Confine/contain incident. One mile north of Lone Mountain, AK. Black spruce. Active fire behavior. Last report unless significant activity occurs.

Healy River, Delta Area Forestry, Alaska DOF. Thirty-eight miles east of Delta Junction, AK. Black spruce and mixed hardwoods. Moderate fire activity.

Predictive Services Discussion: Fire potential in the Alaska interior will moderate slightly today due to cooler temperatures, higher humidity and scattered wet thundershowers. A low pressure system in the West will bring gusty winds to portions of the Southwest, southern Great Basin and Rocky Mountain Areas. Scattered thundershowers are expected across much of the Southeast.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
Wildland / Urban Interface Category.

WILDLAND/URBAN INTERFACE -- STRUCTURE PROTECTION

The primary consideration of any operation is to assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structure.

● Factors that may make an attempt to save a structure hopeless or too dangerous include:

- The fire is making a sustained run and there is little or no clearance between the structure and the fuel.
- The fire behavior is extreme; spot fires are numerous and the spread is outpacing containment.
- Water supply will not last as long as the threat of the fire.
- The fire intensity dictates that you leave the fire area immediately.
- The structure is constructed of wood and has a wood, shake roof.
- The roof of the structure is more than one-quarter involved.
- There is fire inside of the structure or windows are broken and there is no way to quickly repair them.
- You can safely remain at the structure because your escape route could become unusable.

● When implementing a plan to protect structures, consider the following:

- Don't enter a burning structure unless you are trained, equipped, and authorized. Firefighter safety and survival is the number one priority.
- Always stay mobile and wear all of your PPE.
- Back in equipment to allow for a quick escape.
- Coil a short, charged line with fog nozzle on your engine for safety and quick knock down capability.
- Don't make long hose lays. Keep at least 100 gallons of water reserve in your tank.
- Check the road system before the fire approaches. Know bridge limits, alternate access routes, and turnarounds for your vehicle and other support vehicles.
- Determine if residents are home. Leave on the inside and outside lights, regardless of the time of day. Close the garage door.
- Place the owners' ladder at a corner of the home on the side with the least fire threat.
- Coil and charge garden hoses.
- Check and mark hazmat; e.g., LPG, pesticides, and paint storage.
