

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 8, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (109 new fires)
New large fires:	2 (*)
Large fires contained:	3
Uncontained large fires: **	10
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Nationally, there are 28 large fires being managed to achieve multiple objectives.

** Uncontained large fires includes only fires being managed under a full suppression strategy.**

[Link](#) to Geographic Area daily reports.

Department of Interior personnel are assigned to several locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- A total of 354 Fish and Wildlife Service personnel are assigned to Delta, Breton and Bon Secour National Wildlife Refuges, as well as Houma, LA and Mobile, AL.

- A total of 327 National Park Service personnel are assigned to Gulf Islands National Seashore, Jean Lafitte Park and Preserve, Everglades National Park, Dry Tortugas, Biscayne National Park, De Soto National Memorial and Big Cypress National Preserve.

Alaska Area (PL 4)

New fires:	4
New large fires:	1
Uncontained large fires:	8
Type 2 IMTs committed:	2

Eagle Trail, Tok Area Forestry, Alaska DOF. IMT 2 (Allen). One mile south of Tanacross, AK. Spruce. Creeping and smoldering. Traffic delays along the Alaska Highway. Numerous structures threatened.

Delta Complex (4 fires), Delta Area Forestry, Alaska DOF. IMT2 (Paul). Twenty miles north of Delta, AK. Spruce. Creeping and smoldering.

Applegate, Tanana Zone, BLM. Limited perimeter control incident. Started on state land 25 miles northeast of Manley Hot Springs, AK. Black spruce, brush and grass. Creeping and smoldering. Numerous structures threatened.

Hawk River, Southwest Area, Alaska DOF. Previously reported limited perimeter control incident. Twenty-four miles southeast of Kwethluk, AK. Brush and tundra. Backing fire. Last report unless significant activity occurs.

Toklat 2, Tanana Zone, BLM. Limited perimeter control incident. Started on state land 25 miles southwest of Nenana, AK. Black spruce and tundra. Creeping and smoldering. Precipitation occurred over the fire area yesterday. Numerous structures threatened.

Holonada, Tanana Zone, BLM. Previously reported limited perimeter control incident. Started on Fish and Wildlife Service land fifty-two miles east of Hughes, AK. Black spruce and tundra. Creeping and smoldering. Last report unless significant activity occurs.

Eklutna, Mat-Su Area, Alaska DOF. Thirty-seven miles northeast of Anchorage, AK. Timber and grass. Creeping and smoldering

Christian River, Upper Yukon Zone, BLM. Fifty-six miles north of Fort Yukon, AK. Spruce and timber litter. Isolated torching.

*** Tolavana**, Tanana Zone, BLM. Five miles south of Minto, AK. Spruce, brush and grass. Smoldering.

TXS – Texas Forest Service

Predictive Services Discussion: The Southwest will be very hot and dry today with a mixture of wet and dry thunderstorms in eastern New Mexico and west Texas. Winds are expected to increase over the Area starting Wednesday. The Alaska Interior will be warmer and drier with increasing thunderstorm activity throughout the week.

[Link](#) to Predictive Services Outlook products.

**Today's discussion is from the
Entrapment Category.**

VEHICLE ENTRAPMENT

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Fire out around the vehicle if there is time.
- Park behind a natural barrier or structure.
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles or draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway; remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
 - Temperatures may reach over 200 degrees Fahrenheit.
 - Smoke and sparks may enter the vehicle.
 - Plastic parts may start to melt and give off toxic gases.
 - Windows may start to crack.
 - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
 - Each crewmember should cover him/herself with a fire shelter.
 - Exit the vehicle from the side away from the greatest heat.
 - Stay together and get as low to the ground as possible, moving away from the vehicle.
 - Deploy your shelter in a safe area.
