

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, May 11, 2010 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Moderate (240 new fires)
 New large fires: 2 (*)
 Large fires contained: 0
 Uncontained large fires: ** 4
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

Nationally, there are 0 large fires being managed to achieve multiple objectives.

** Uncontained large fires includes only fires being managed under a full suppression strategy.**

Predictive Services Discussion: Dry and windy weather will continue today over southeast Arizona, southern and eastern New Mexico and over much of west Texas. Elsewhere, rain is expected over the Great Lakes and the Mid-Atlantic States.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
LCES (Lookouts, Communication, Escape
Routes, and Safety Zones) Category.

Escape Routes

An escape route is a preplanned and understood route to reach a safety zone.

- What are the primary concerns in choosing an escape route?
- - Select the closest, least obstructed route.
 - Plan for more than one escape route.
 - Avoid an uphill escape.
 - Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods). NWCG recommends using hot-pink flagging marked "Escape Route" (NFES 0566). Crews with colorblind members may wish to carry and utilize fluorescent chartreuse flagging (NFES # 2396).
- - Determine escape time--consider slowest person, fatigue, and temperature factors.
 - Continuously reassess the situation with regard to work progress and additional resource arrivals.
 - Assure all line personnel are familiar with escape routes.
 - Vehicles parked for escape.
