

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, May 12, 2010 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (185 new fires)
 New large fires: 2 (*)
 Large fires contained: 2
 Uncontained large fires: ** 4
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

Nationally, there are 0 large fires being managed to achieve multiple objectives.

** Uncontained large fires includes only fires being managed under a full suppression strategy.**

Department of Interior personnel are assigned to several locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- A total of 177 Fish and Wildlife Service personnel are assigned to Delta, Breton and Bon Secour National Wildlife Refuges, as well as Houma, LA and Mobile, AL.

- A total of 147 National Park Service personnel are assigned to Gulf Islands National Seashore, Everglades National Park, Biscayne National Park, De Soto National Memorial and Big Cypress National Preserve.

Southern Area (PL 1)

New fires: 120
 New large fires: 2
 Uncontained large fires: 3

* **Mother's Day**, National Forests in Florida. Fifteen miles northeast of Lake City, FL. Southern rough. Moderate fire activity.

* **McConnell Heights**, Florida DOF. Two miles southwest of Crystal River, FL. Southern rough. No further information received.

523, National Forests in Alabama. Four miles west of Heflin, AL. Timber litter. Moderate fire activity.

Predictive Services Discussion: The Southwest will be dry today with gusty winds over portions of southeast New Mexico and west Texas. Dry weather is also on tap for Florida and most of the Southeast States.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
LCES (Lookouts, Communication, Escape Routes, and Safety
Zones) Category.

Escape Routes (part 2)

Escape Routes are the path the firefighter takes from their current locations, exposed to the danger, to an area free from danger. Notice that escape routes is used instead of escape route(s). Unlike the other components, there always must be more than one escape route available to the firefighter. Escape routes are probably the most elusive component of LCES. Their effectiveness changes continuously. As the firefighter works along the fire perimeter, fatigue and spatial separation increases the time required to reach the safety zone. The most common escape route (or part of an escape route) is the fireline. On indirect or parallel fireline, situations become compounded. Unless safety zones have been identified ahead, as well as behind, firefighters retreat may not be possible.

- Have you ever timed an escape route? If not how do you judge its effectiveness?
- Describe a time when you were uncomfortably distant from your escape route.
- Describe a method you have used to communicate an escape route to your crews.
