

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, November 10, 2010 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (138 new fires)
New large fires:	8 (*)
Large fires contained:	0
Uncontained large fires: **	12
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 10 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	114
New large fires:	7
Uncontained large fires:	11

Fish Trap Complex, Daniel Boone NF. Ten miles east of Stanton, KY. Logging slash and hardwood litter. No new information.

* **Arabia Bay**, Georgia Forestry Commission. Six miles north of Homerville, GA. Hardwood litter. Moderate fire activity with occasional torching.

* **Sett Ranch**, Texas Forest Service. Started on private land eleven miles northwest of Metcalf Gap, TX. Hardwood litter. Residences threatened. No further information received.

Greasy, Osage Agency, BIA. Five miles east of Ralston, OK. Timber and grass. Reduction in acreage due to more accurate mapping. No further information received.

Peeper, Okmulgee Field Office, BIA. Three miles northeast of Slick, OK. Timber. No further information received.

Van Buren, Arkansas Forestry Commission. Sixteen miles northwest of Clinton, AR. Timber. No further information received.

* **Kenworthy**, Osage Agency, BIA. Three miles northwest of Pawhuska, OK. Grass. No further information received.

* **Curry**, Texas Forest Service. Started on private land twelve miles southwest of Plainview, TX. Brush. Numerous structures threatened. No further information received.

* **Leslie**, Arkansas Forestry Commission. One miles west of Leslie, AR. Logging slash. No further information received.

* **Lost Cabin**, Oklahoma DOF. Four miles south of Keys, OK. Timber. Structures threatened. No further information received.

* **Cold Springs**, National Forests in North Carolina. Two miles northeast of Kyle, NC. Hardwood litter. Minimal fire activity.

Predictive Services Discussion: A low pressure system digging into the West will create northerly offshore winds across southern California today. Gusty winds will continue over the western Great Lakes. Low relative humidity will persist across the Southeast.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
Environmental Factors Category.

MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke.
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area.
- Identification of alternative traffic routes as part of the incident/project traffic plan.
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice.
- When potential smoke-related problems are identified:
 - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
 - Notify local law enforcement units and highway departments of a potential problem.
 - Implement preplanned actions such as posting smoke warning signs.
 - Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
