

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 2, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (98 new fires)
New large fires:	5 (*)
Large fires contained:	4
Uncontained large fires: **	12
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

Nationally, there are 70 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy. **

[Link](#) to Geographic Area daily reports.

Interagency personnel are assigned to a number of locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- Support to the Fish and Wildlife Service includes these areas: Bayou Sauvage NWR (LA), Big Branch Marsh NWR (LA), Breton NWR (LA), Delta NWR (LA), Shell Key NWR (LA), Bon Secour NWR (AL), Grand Bay NWR (AL), St. Vincent NWR (FL), and McFaddin NWR (TX).

- Support to the National Park Service includes these areas: Gulf Islands National Seashore (FL), Jean Lafitte Park and Preserve (LA), Everglades National Park (FL), Dry Tortugas (FL), Biscayne National Park (FL), De Soto National Memorial (FL) and Big Cypress National Preserve (FL).

Eastern Great Basin Area (PL 3)

New fires:	5
New large fires:	3
Uncontained large fires:	6
Type 2 IMTs committed:	3

Whitehawk Complex, Boise NF. IMT 2 (Wilde). Fourteen miles northeast of Lowman, ID. Timber. Smoldering. Precipitation occurred over the fire area yesterday.

Harris Complex (4 fires), Southwest Area Office, Idaho Dept. of Lands. IMT 2 (Heintz). Started on private land five miles southeast of Horseshoe Bend, ID. Timber. Creeping and smoldering. Road closures in effect. Reduction in acreage due to more accurate mapping.

Hurd, Boise NF. IMT 2 (Kidd). Eight miles northwest of Cascade, ID. Timber. Creeping and smoldering.

* **Subway**, Zion NP. Ten miles north of Springdale, UT. Ponderosa pine and juniper. Active fire behavior with torching. Last report unless significant activity occurs.

* **Little Jake**, Dixie NF. Twelve miles northwest of Escalante, UT. Pine, juniper and oak. Backing fire with isolated torching and short range spotting. Last report unless significant activity occurs.

* **Augusi**, Vernal Field Office, BLM. Sixty miles south of Vernal, UT. Pinion pine, juniper, brush and grass. No further information received. Last report unless significant activity occurs.

Predictive Services Discussion: Warm, dry offshore winds will expand today from northern California into southwest Oregon. Warmer and drier conditions will spread across the West under the influence of a large high pressure ridge. Showers and thunderstorms will stretch from the Great Lakes to the southern Great Plains.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the Environmental Factors Category.

SMOKE EXPOSURE

Exposure to smoke during fire operations can be a significant safety concern. Research has shown that smoke exposure on prescribed fires, especially in the holding and ignition positions, often exceeds that on wildfires. There are many precautions that can be taken to reduce personnel from exposure to smoke.

● Planning: Smoke exposure needs to be considered when planning suppression tactics and prescribed fires. Simple actions can mitigate smoke exposures, such as:

- Altering line locations can have a significant impact on smoke exposure.
- Placing firelines in areas of lighter fuels or moving lines to roads or other barriers that will require less holding, patrol and mop-up will significantly reduce the smoke exposure to personnel.
- Use flanking attack as opposed to head attack (where appropriate) in heavy smoke situations.
- Check fire behavior forecasts for smoke and inversion potential.
- In heavy smoke, give up acres to gain control.

● Implementation: Many techniques can help reduce the exposure of personnel to heavy smoke, such as:

- Rotating people out of the heaviest smoke area may be the single most effective method.
- Locate camps and incident command posts in areas that are not prone to inversions.
- Minimize snag falling, consistent with safety concerns, to avoid putting heavy fuels on the ground that will require mop-up.
- Changing firing patterns and preburning (black lining) during less severe conditions can greatly reduce exposure to smoke.
- The use of retardant, foam or sprinklers can also significantly reduce the workload and exposure time for holding crews.
