

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 22, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Moderate (229 new fires)
 New large fires: 1 (*)
 Large fires contained: 0
 Uncontained large fires: ** 6
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1

Nationally, there are 79 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: A low pressure trough moving through the West will bring scattered showers and wet thunderstorms to Utah, Colorado, Wyoming and the Southwest. Showers are also on tap for portions of Idaho and Montana. In addition, gusty winds are expected over the Great Basin and Rocky Mountains.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
Miscellaneous Category.

Scenarios are situations that can arise on a Wildland Fire or Aviation incident and are meant to add a realistic setting for the application of Today's Safety Discussion.

Potentially Violent Personal Encounters

Firefighters need to be aware of the potential for personal violence directed against them while they are engaged in fire operations and be alert to the warning signs during personal encounters with individuals. They also need to be aware of potential criminal activity (e.g., illegal dumping on public lands, clandestine drug labs, marijuana cultivation, etc.) in remote areas of public lands, and be prepared to leave the area immediately as persons engaged in such criminal activity can be hostile and violent if discovered.

- If a firefighter meets a member of the public who is hostile, the employee should:
 - be polite and non-threatening,
 - do not try to reason with potentially violent individuals,
 - leave the area as soon as possible,
 - report the incident to their supervisor, dispatch and law enforcement authorities.
- The vast majority of public land users are courteous and friendly, and want to use public lands properly and legally. Most encounters will be friendly and educational to both parties. Firefighters should be aware of the fact that there are exceptions to this rule, and should cultivate a situational awareness when they are in the field.
- If a firefighter feels at all uneasy or uncertain about a situation, they should not be embarrassed to leave the area. Firefighter safety and health are always primary considerations on the job.
- **Note:** It is unlawful for anyone to physically or verbally abuse a Federal employee who is acting within the scope of their duties—notify law enforcement at once if either occurs.
