Predictive Services Discussion: Scattered thunderstorms, mostly wet, will extend from the Southwest through the Great Basin and into the northern Rockies. Seasonal scattered showers and thunderstorms will occur over parts of the eastern half of the nation. U.S. weather is still being controlled by the strong mid-level high situated over Kansas.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the
Fireline Safety Category.**

OPERATIONAL BRIEFINGS

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the cover of the NWCG Incident Response Pocket Guide:

● **Situation:**

- Fire name, location, map orientation, other incidents in the area
- Terrain influences
- Fuel type and conditions
- Fire weather (previous, current, and expected)
- Fire behavior (previous, current, and expected)

● **Mission/Execution:**

- Command (Incident Commander/immediate supervisor)
- Leader's intent
- Specific tactical assignments
- Contingency plans

● **Communications:**

- Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.)
- Medevac Plan

● **Service/Support:**

- Other resources that may be working adjacent to you and those available to order
- Aviation operations
- Logistics (e.g., transportation, supplies, equipment)

● **Risk Management:**

- Identify known hazards and risks
- Identify control measures to eliminate hazards and reduce risk
- Identify trigger points for disengagement or reevaluation of operational plan
