

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, August 2, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Moderate (248 new fires)
New large fires:	8 (*)
Large fires contained:	4
Uncontained large fires: **	13
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	4

Nationally, there are 27 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	113
New large fires:	5
Uncontained large fires:	7
Type 2 IMTs committed:	2

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Honey Prairie, Okefenokee NWR. Georgia IMT 2 (Floyd). Five miles northeast of Fargo, GA. Southern rough. Smoldering.

Mitre Peak, Texas Forest Service. Ten miles northwest of Alpine, TX. Brush. Moderate fire activity.

* **Turkey Track**, Texas Forest Service. Six miles east of Stinnett, TX. Brush. Moderate fire activity.

* **Post Oak**, Texas Forest Service. Ten miles north of Jacksboro, TX. Brush. Moderate fire activity.

High Peak, Ouachita NF. Five miles northeast of Norman, AR. Hardwood litter. Creeping. Last report unless significant activity occurs.

* **Langley Hill**, Oklahoma DOF. Twelve miles south of Stilwell, OK. Hardwood litter. No further information received.

* **Tates Bluff**, Arkansas Forestry Commission. Eight miles southwest of Sparkman, AR. Timber. No further information received.

* **Sunflower**, Arkansas Forestry Commission. Four miles east of Bonnerdale, AR. Timber litter. No further information received.

Predictive Services Discussion: The monsoonal moisture surge in the West begins to ease. Scattered thunderstorms, mostly wet, will extend from the Southwest through the eastern parts of the Great Basin and into the northern Rockies. Seasonal scattered showers and thunderstorms will occur in the northeast but retreat towards Florida in the southeast. U.S. weather is still being controlled by the strong, mid-level high situated over Kansas.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the Entrapment Category.

VEHICLE ENTRAPMENT

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Burn out around the vehicle if there is time.
- Park behind a natural barrier or structure. Consider that a structure could become involved which could severely impact nearby exposures/vehicles ([Harris Fire, SoCal, 2007](#)).
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles and draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway; remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
 - Temperatures may reach over 200 degrees Fahrenheit.
 - Smoke and sparks may enter the vehicle.
 - Plastic parts may start to melt and give off toxic gases.
 - Windows may start to crack.
 - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
 - Each crewmember should cover themselves with a fire shelter.
 - Exit the vehicle from the side away from the greatest heat.
 - Stay together and get as low to the ground as possible, moving away from the vehicle.
 - Deploy your shelter in a safe area.
