

**National Interagency Coordination Center
Incident Management Situation Report
Monday, August 29, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Moderate (259 new fires)
New large fires:	12 (*)
Large fires contained:	9
Uncontained large fires: **	40
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	12

Nationally, there are 53 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

A Type 1 Incident Management Team (Giachino) is assigned to establish and manage a mobilization center at East Farmingdale, New York in response to Hurricane Irene.

Northern Rockies Area (PL 3)

New fires:	6
New large fires:	1
Uncontained large fires:	7
Type 2 IMTs committed:	6

West Riverside, Montana DNR. IMT 2 (Grant). Twelve miles southeast of Missoula, MT. Timber. Active fire behavior.

*** Granite Pass**, Lolo NF. IMT 2 (Kusicko). Twenty-five miles southwest of Missoula, MT. Timber. Group tree torching.

Diamond Complex (two fires), Miles City Field Office, BLM. IMT 2 (Heintz). Twenty-nine miles south of Ashland, MT. Timber. Smoldering with occasional flare-ups. Structures threatened. Reduction in acreage due to more accurate mapping.

Saddle Complex – Bitterroot Branch, Bitterroot NF. IMT 2 (Hutton). Thirty miles southwest of Darby, MT. Timber. Moderate fire activity. Structures threatened. Evacuations in effect.

Ariana 2, Northwest Land Office, Montana DNR. IMT 2 (Fry). Started on private land fourteen miles southeast of Libby, MT. Grass. Backing fire.

Elk Park, Lewis and Clark NF. Twenty-two miles northwest of Sulphur Springs, MT. Grass. Creeping and smoldering. Structures threatened.

Black Springs Complex, Northern Cheyenne Agency, BIA. Transfer of command from IMT 2 (Benes) back to local unit will occur today. Six miles west of Lame Deer, MT. Timber. Minimal fire activity. Reduction in acreage due to more accurate mapping.

Hammer Creek, Flathead NF. Previously reported incident. Twenty-one miles east of Condon, MT. Timber. Active ground fire with single tree torching. Last report unless significant activity occurs.

Big Salmon Lake, Flathead NF. Previously reported incident. Fifteen miles northeast of Condon, MT. Timber. Active ground fire with group tree torching. Last report unless significant activity occurs.

Predictive Services Discussion: Scattered thunderstorms will develop across the Southwest, eastern Great Basin and Rocky Mountains. Scattered showers and thunderstorms are expected over parts of the High Plains, and Great Plains near a trough and over the Upper Great Lakes Region near a front. Showers and thunderstorms are also forecast over the Southern Atlantic Coast States near a front and over Florida near a trough. Conditions will remain generally hot across much of the West.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the
Weather / Fire Behavior Category.**

NFDRS POCKET CARDS

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area.

● The Pocket Card provides:

- A general indicator of the potential fire danger for a given rating area.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures.

● Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than 5%, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at <http://fam.nwcg.gov/fam-web/pocketcards/default.html/>. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the Pocket Card for site specific fire behavior predictions and fireline actions or without an interpretive briefing.
- Review definitions and implications of ERC and BI values.
