

**National Interagency Coordination Center
Incident Management Situation Report
Friday, February 18, 2011 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity:	Heavy (2,291 new fires)
New large fires:	26 (*)
Large fires contained:	18
Uncontained large fires: **	12
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 0 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 1)

New fires:	2,194
New large fires:	21
Uncontained large fires:	9
Type 2 IMTs committed:	1

* **Judes Gap**, North Carolina DNR. North Carolina IMT 2 (Hendricks). Seven miles east of Edneyville, NC. Hardwood litter. Backing fire with torching and running.

* **Lipscomb County Complex** (2 fires), Texas Forest Service. Started on private land 20 miles northwest of Higgins, TX. Brush and grass. Active fire behavior.

* **Whiteface**, Texas Forest Service. Started on private land four miles west of Whiteface, TX. Brush and grass. No further information received. Last report unless significant activity occurs.

* **Harper Road**, Texas Forest Service. Started on private land 18 miles northwest of San Angelo, TX. Juniper, mesquite and brush. No further information received. Last report unless significant activity occurs.

* **Valentine**, Georgia Forestry Commission. Fourteen miles northwest of Trenton, GA. Hardwood litter. No further information received. Last report unless significant activity occurs.

* **Lumber Plant**, North Carolina DNR. Two miles north of Low Gap, NC. Hardwood litter. Minimal fire activity. Residences threatened.

* **Hopewell Hollow**, Arkansas Forestry Commission. Three miles east of Norfolk, AR. Timber. No further information received. Last report unless significant activity occurs.

* **Wirth**, Arkansas Forestry Commission. Four miles south of Wirth, AR. Hardwood litter. No further information received. Last report unless significant activity occurs.

Predictive Services Discussion: East of the Rockies, low pressure systems will track across the northern and northeastern states bringing rain and snow. Trailing cold fronts will bring cooler and wetter conditions to the central U.S. In the Southern Plains and southeastern states, persistent warm weather will bring periods of dry and windy conditions that may produce Red Flag conditions. A cold low pressure trough will continue to bring rain and snow from the West Coast to the Rockies.

Miscellaneous Category.**

Radio Narrow banding

The ability to have positive, reliable communication is one of the most important safety considerations we have in Wildland fire. As we are forced to adapt to technological changes, maintaining good radio communications becomes more complex and requires a heightened level of skill and awareness from all firefighters. The following are some facts and suggestions that may make radio communications easier

- Federal Agencies have been congressionally mandated to narrowband their frequencies by January 1, 2005. State and municipal agencies will not have to follow suit until the year 2013. For firefighters trying to determine if a frequency will be narrow banded or not, this means that it is probably a good bet that Federal frequencies (those frequencies between 162.0000 and 174.0000 Mhz) are.
- Operating your radio in the wideband mode while working in a narrowband environment may cause radio communication problems for everyone working on that channel. The symptoms may range from distorted transmissions to no transmission at all.
- Before we were mandated to work in narrowband, frequencies were listed with just three digits past the decimal point. It is imperative that we now convey frequencies with four digits past the decimal point, for example 168.xxxx
- Some firefighters mistakenly believe that if they simply punch in four numbers past the decimal point, the channel will then be narrow banded. This is not true! Each channel must be programmed specifically to operate in wideband or narrowband. Narrowband programming instructions for most handheld radios can be found at www.fireradios.net Another website that has programming instructions as well as pocket cards that can be printed is: www.fs.fed.us/fire/nicd/documents
- Check your frequency guides, plans and maps to see which mode the frequencies are supposed to be operating on. If these don't have the information you need, find it and make pen and ink notes for yourself.
- If available, have a radio technician check your radio to ensure you are operating in the proper mode on the assigned frequencies.
- Discuss the narrow/wide band concept with all firefighters, managers and pilots.
