

**National Interagency Coordination Center
Incident Management Situation Report
Monday, February 28, 2011 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (75 new fires)
New large fires:	20 (*)
Large fires contained:	7
Uncontained large fires: **	18
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	73
New large fires:	18
Uncontained large fires:	17

* **Willow Creek South**, Texas Forest Service. Started on private land 16 miles northeast of Amarillo, TX. Grass. Running and spotting. Numerous structures threatened.

* **Tom**, Texas Forest Service. Started on private land 12 miles northeast of Andrews, TX. Grass. Running and spotting.

* **Matador West**, Texas Forest Service. Two miles southwest of Matador, TX. Grass. Running and spotting. Structures threatened.

* **Mitchell County Complex** (3 fires), Texas Forest Service. Started on private land 21 miles southeast of Big Spring, TX. Grass. Running and spotting. Numerous structures threatened.

Gus Canalas, Texas Forest Service. Four miles southeast of Premont, TX. Brush and grass. No further information received.

James River Road, Texas Forest Service. Started on private land seven miles south of Mason, TX. Brush and grass. No further information received.

* **Shepard's Complex**, Texas Forest Service. Started on private land six miles southwest of Scurry, TX. Timber. Running and spotting. Structures threatened.

* **Tanglewood Complex**, Texas Forest Service. Six miles south of Amarillo, TX. Running and spotting. Grass. Structures threatened.

HWY 2357 Complex (3 fires), Texas Forest Service. Started on private land six miles northwest of Channing, TX. Brush and grass. No new information.

* **Williams**, Texas Forest Service. Started on private land eight miles southwest of Big Lake, TX. Grass. Running and spotting. Structures threatened.

Smith Run, Shenandoah NP. Five miles east of Wakefield Manor, VA. Hardwood slash and brush. No new information.

* **Briscoe**, Texas Forest Service. Started on private land 12 miles northwest of Silverton, TX. Grass. Running and spotting.

* **2526**, Texas Forest Service. Started on private land 14 miles south of Cisco, TX. Grass. Running and spotting. Structure threatened.

* **Gregory Mill**, National Forests in Florida. Fifteen miles south of Bristol, FL. Southern rough. No further information received.

* **Quinn Ranch**, Texas Forest Service. Started on private land 21 miles southeast of Tyler, TX. Grass. Running and spotting. Numerous structures threatened.

* **Accident**, Texas Forest Service. Started on private land four miles west of Midland, TX. Grass. Running and spotting.

* **McClellan**, Texas Forest Service. Started on private land 10 miles east of Stamford, TX. Timber. Running and spotting. Structures threatened.

N5S – Capitan District, New Mexico State Forestry

Predictive Services Discussion: Critical fire weather is expected across the southern Rio Grande Valley of Texas today. The National Weather Service has issued a Red Flag Warning today, due to a combination of gusty northwest winds, relative humidity in the 8-18% range and temperatures in the 80s. Areas of eastern New Mexico, western Texas, and Oklahoma that saw very critical fire weather Sunday will see some easing of conditions today. The Pacific Northwest and many areas from the Mississippi eastward will see rain or showers today.

**Today's discussion is from the
Motorized Operations Category.**

Parking Safely on Slopes

In 2005, three fireline fatalities related to improper parking on slopes occurred. One involved a water tender, another a fire engine and the third was a command vehicle. In wildland fire operations, we frequently exit vehicles quickly, but it is imperative that anytime a vehicle is left unattended, time is taken to assure it is parked safely and will not present a hazard to ourselves or others. Standard operating procedures for parking vehicles safely on slopes are:

- Turn the front wheels uphill or into the inside/embankment.
- Firmly set the emergency brake.
- Put the vehicle in park (if automatic transmission) or in forward gear (if manual transmission); do not leave it in neutral.
- Turn off the engine.
- Chock the wheels. When utilizing chocks, make sure they are on the correct side in reference to the slope. Assure the chocks are approved to hold the weight of the vehicle and will grip on the road surface.
- Be especially aware of safe parking on slopes on incidents when moving a vehicle frequently, as in using engines in pumping operations along a roadway -- it is very easy to get complacent with procedures or not even realize that you are on a slightly different slope which would require placing chocks differently. It is the driver's responsibility to assure not only that the vehicle is operated safely, but is positioned and parked safely.
