

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, July 2, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (155 new fires)
New large fires:	3 (*)
Large fires contained:	6
Uncontained large fires: **	18
Area Command Teams committed:	2
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	9

Nationally, there are 18 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel, two each from the 145th Airlift Wing, North Carolina Air National Guard, Charlotte, NC, and the 302nd Airlift Wing, Air Force Reserve, Colorado Springs, CO, are deployed to Albuquerque, NM. Col. Jay Pittman is the Air Expeditionary Group Commander.

Southwest (PL 5)

New fires:	19
New large fires:	2
Uncontained large fires:	10
Area Command Teams committed:	2
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	3

NIMO (Gage) is assigned to the Coronado National Forest to provide strategic planning and large fire support. Area Command Team (Oltrogge) is assigned to manage the Las Conchas and Pacheco fires.

Las Conchas, Bernalillo District, New Mexico DOF. IMT 1 (Reinarz and Hughes). Thirteen miles west of Los Alamos, NM. Timber and grass. Active fire behavior. Numerous residences threatened. Evacuations in effect.

Donaldson, Capitan District, New Mexico DOF. IMT 2 (Pierson). Twenty-eight miles northwest of Roswell, NM. Grass. Active fire behavior. Residences threatened.

Pacheco, Santa Fe NF. IMT 2 (Templin). Nine miles north of Santa Fe, NM. Timber and slash. Minimal fire activity. Structures threatened.

Wallow, Apache-Sitgreaves NF. Area Command Team (Waterbury). IMT 1 (Pincha-Tulley). Twenty-three miles southwest of Alpine, AZ. Timber and grass. Minimal fire activity.

Stanley, San Carlos Agency, BIA. IMT 2 (Rapp). Twenty miles east of Globe, AZ. Juniper, brush and grass. Moderate fire activity.

Monument, Coronado National Memorial, NPS. Three miles west of Sierra Vista, AZ. Timber. Minimal fire activity.

* **Otero Mesa**, Las Cruces District, BLM. Thirty-five miles south of Alamogordo, NM. Grass. Moderate fire activity.

Copper Creek, Coronado NF. Twelve miles north of Mammoth, AZ. Brush. Minimal fire activity.

Little Lewis, Lincoln NF. Two miles southeast of Sacramento, NM. Timber and grass. Minimal fire activity.

Number 3, Mescalero Agency, BIA. Sixteen miles southwest of Hondo, NM. Brush and grass. Minimal fire activity.

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Juniper Road, North Carolina DFR. North Carolina IMT 2 (Hildreth). Thirteen miles northeast of Rocky Point, NC. Brush. Minimal fire activity. Numerous residences threatened.

Honey Prairie, Okefenokee NWR. IMT 2 (Wilde). Five miles northeast of Fargo, GA. Southern rough. Minimal fire activity. Numerous residences threatened.

Sweat Farm Again, Georgia DOF. Northeast Compact IMT 2 (Schenk). IMT is also managing the Racepond fire. Twelve miles west of Waycross, GA. Southern rough. Minimal fire activity. Residences threatened.

Racepond, Georgia DOF. Twelve miles south of Hoboken, GA. Hardwood litter. Minimal fire activity. Structures threatened.

Impassable Bay Complex (2 fires), National Forests in Florida. IMT 2 (Kidd). Fifteen miles northeast of Lake City, FL. Southern rough. Minimal fire activity.

Espanola, Florida DOF. Florida IMT 2 (Brady). Seven miles northwest of Bunnell, FL. Southern rough. No further information received.

Simmons Road, North Carolina DFR. Nine miles northeast of Tar Heel, NC. Brush. Minimal fire activity. Residences threatened.

Predictive Services Discussion: A scattered mix of wet and dry thunderstorms will develop across the Southwest, mainly over higher terrain. Showers and thunderstorms will develop along a cold front stretching from the Great Lakes to high plains of Colorado and Wyoming. Showers and thunderstorms will also dot the Gulf and mid-Atlantic states.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the Motorized Operations Category.

ATV Safety

The use of ATVs for wildland fire suppression and prescribed fire operations has increased dramatically over the last ten years. Note: Several agencies have required training for ATV operations (check your agency's requirements).

- Most injuries associated with ATVs occur when:
 - the driver loses control (When the operator encounters a change of terrain or swerves to avoid an obstacle, it causes an abrupt change of balance and loss of control.)
 - the vehicle rolls over
 - the driver or passenger is thrown off
 - the operator's loss of attention to what, where, and how an ATV is being operated
 - or there is a collision with a fixed object
- Identified contributing factors to ATV accidents include:
 - rider inexperience
 - excessive speed--excessive speed, combined with rough terrain, can create enough pitch and bounce to cause the operator to lose control of the vehicle
 - lack of helmet use
 - the ATV is improperly loaded or load weight exceeds vehicle operation capacity
 - the operator carries a passenger that affects the operators control and operation of the ATV
- Safety measures for ATV use include:
 - Conduct pre-ride inspection-- This inspection should include checking tires, throttle cable, front and rear brakes, lights and switches, oil and fuel, chain or drive shaft, air filter, clean out of weeds and other debris from around engine and other hot components, and the chassis for any defects or wear.
 - Single riders only--Injuries frequently occur to passengers, therefore riding double should not be permitted.
 - Always wear PPE- helmets, eye protection, and protective clothing. Appropriate helmets are those designed for motorcycle (not firefighting) use, and should include safety visors/face shields, goggles, or safety glasses for eye protection.
 - Use headlights to improve visibility by other vehicles
 - Maintain speeds acceptable for riding conditions, especially over uneven terrain
 - Traversing slopes should be avoided
 - Mounted or towed loads should not exceed manufacturer's recommendation and should be properly mounted so that weight transfer does not affect the center of gravity of the machine--mounting a tank (e.g., drip torch) on the rear of the vehicle increases the chances for a rear turnover.
 - Do not drive on public roads - Collisions with automobiles on public roads are the most common cause of fatal ATV accidents. It may be illegal to operate an ATV on public roads—check your state's laws.
