

**National Interagency Coordination Center
Incident Management Situation Report
Friday, July 15, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (150 new fires)
New large fires:	7 (*)
Large fires contained:	5
Uncontained large fires: **	16
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nationally, there are 23 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 4)

New fires:	47
New large fires:	1
Uncontained large fires:	12
Type 2 IMTs committed:	3

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Simmons Road, North Carolina DFR. North Carolina IMT 2 (Hendricks). IMT is also managing the Juniper Road fire. Nine miles northeast of Tar Heel, NC. Brush. Minimal fire activity. Residences threatened.

Juniper Road, North Carolina DFR. Thirteen miles northeast of Rocky Point, NC. Brush. Minimal fire activity. Residences threatened.

Honey Prairie, Okefenokee NWR. Florida IMT 2 (West). Five miles northeast of Fargo, GA. Southern rough. Moderate fire activity. Numerous residences threatened.

Sweat Farm Again, Georgia DOF. Twelve miles west of Waycross, GA. Southern rough. Minimal fire activity. Residences threatened.

Racepond, Georgia DOF. Twelve miles south of Hoboken, GA. Hardwood litter. Minimal fire activity. Structures threatened.

Clay, Texas Forest Service. Four miles northeast of Forsan, TX. Brush. Minimal fire activity.

* **North Fork**, Texas Forest Service. Five miles northeast of Electra, TX. Brush and grass. Active fire behavior with spotting.

Nolan County Complex, Texas Forest Service. Six miles southeast of Sweetwater, TX. Grass and brush. Minimal fire activity.

Browning, Texas Forest Service. Six miles northeast of Fluvanna, TX. Brush. Structures threatened. Reduction in acreage due to more accurate mapping. No further information received.

Williams, Texas Forest Service. Thirteen miles south of Kent, TX. Brush. Moderate fire activity.

Armstrong, Texas Forest Service. Ten miles west of Jacksboro, TX. Brush and grass. Structures threatened. Interior smoldering.

Cinch Ranch, Texas Forest Service. One mile west of Memphis, TX. Brush and grass. Interior smoldering.

SCU – Santa Clara Unit, Cal Fire

Predictive Services Discussion: Gusty south to southwest winds and low relative humidity levels will persist into Friday across the Great Basin southward into the deserts of Southern California and Arizona. Widely scattered mainly wet thunderstorms will continue over central New Mexico northward into portions of the Central and Northern Rockies. Hot and dry across the southern and central Plains with shower and storm activity continuing over the southeastern U.S.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Weather / Fire Behavior Category.

EXTREME FIRE BEHAVIOR 1

Mild, moderate and EXTREME fire behavior has always been present in cases of shelter deployment. It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions as well as predicted and current weather conditions. As fire behavior changes, it is critical to act decisively to the changing situation.

● Discuss the following indicators of extreme fire behavior:

- Relative humidity less than 15%
- 1-hour fuel moisture less than 5%
- Transition from surface to crown fire
- Smoldering fires that exist in the early part of the day are beginning to burn very actively as the day progresses.
- Approaching thunderheads with dark clouds beneath
- Presence of dust devils indicating an unstable atmosphere
- Increased spotting
- Sudden calm
- High clouds moving fast in direction different from surface wind
- Predicted Haines Index of 5 and 6 in those areas where this level is a good indicator of atmospheric instability
- Fire whirls
