

**National Interagency Coordination Center
Incident Management Situation Report
Monday, July 18, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (151 new fires)
New large fires:	4 (*)
Large fires contained:	3
Uncontained large fires: **	20
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Nationally, there are 25 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Southern Area (PL 4)

New fires:	38
New large fires:	1
Uncontained large fires:	12
Type 2 IMTs committed:	3

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Simmons Road, North Carolina DFR. North Carolina IMT 2 (Hendricks). IMT is also managing the Juniper Road fire. Nine miles northeast of Tar Heel, NC. Brush. Moderate fire activity.

Honey Prairie, Okefenokee NWR. Florida IMT 2 (West). Five miles northeast of Fargo, GA. Southern rough. Smoldering. Numerous residences threatened.

Juniper Road, North Carolina DFR. Thirteen miles northeast of Rocky Point, NC. Brush. Creeping and smoldering.

Sweat Farm Again, Georgia DOF. Twelve miles west of Waycross, GA. Southern rough. Minimal fire activity. Residences threatened. Precipitation occurred over the fire area.

Racepond, Georgia DOF. Twelve miles south of Hoboken, GA. Hardwood litter. Minimal fire activity. Structures threatened. Precipitation occurred over the fire area.

Jeter II, Texas Forest Service. Two miles southwest of Albany, TX. Brush. Moderate fire activity.

Arbuckle Complex, Oklahoma DOF. Three miles south of Dougherty, OK. Timber and grass. Isolated torching and creeping. Numerous structures threatened.

Williams, Texas Forest Service. Thirteen miles south of Kent, TX. Brush. Moderate fire activity.

Clay, Texas Forest Service. Four miles northeast of Forsan, TX. Brush. Minimal fire activity.

*** Sandy Creek**, Wichita Mountains NWR. Fourteen miles west of Sherman, TX. Brush. Minimal fire activity.

Agua Creek, Texas Forest Service. Three miles northwest of Sundown, TX. Grass. Minimal fire activity.

Timberline, Merritt Island NWR. Two miles east of Titusville, FL. Grass. No new information. Last report unless new information is received.

Southwest (PL 4)

New fires: 11
 New large fires: 2
 Uncontained large fires: 5
 Type 1 IMTs committed: 1

Las Conchas, Bernalillo District, New Mexico State Forestry. IMT 1 (Turman). Thirteen miles southwest of Los Alamos, NM. Timber and grass. Moderate fire activity. Numerous structures threatened. Reduction in acreage due to more accurate mapping.

Pacheco, Santa Fe NF. Nine miles north of Santa Fe, NM. Timber and slash. Minimal fire activity.

Jack Complex (3 fires), Gila NF. Twenty-two miles east of Glenwood, NM. Timber and grass. Moderate fire activity with group tree torching.

*** Bolt**, Coconino NF. Fifteen miles south of Flagstaff, AZ. Grass. No further information received. Last report unless significant activity occurs.

* **Point**, Grand Canyon NP. Thirteen miles northwest of Grand Canyon Village, AZ. Timber. Creeping and smoldering. Last report unless significant activity occurs.

Predictive Services Discussion: Gusty southwest winds will continue across much of the Great Basin. Scattered wet and dry thunderstorms will develop from Arizona and New Mexico to Wyoming. A cold front will push through the Great Lakes, producing showers and thunderstorms across New England and the Upper Midwest. Scattered thunderstorms will dot the Gulf and lower Atlantic states.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the Hazard Tree Category.

Hazard Trees – Situational Awareness

Snags (dead, standing trees without leaves or needles in the crowns) and green hazard trees present a significant threat to wildland firefighter safety. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw off embers creating spot fires in advance of the main fire. Snags may burn through more quickly than green trees and can fall without warning. Live, green trees weakened by insects, disease, weather, fire, and age presents another hazard and they can also fall without notice.

- The risk of serious injuries from hazard trees may increase during the night operational period when visibility is reduced.
- While work in cooler, nighttime environments can help control efforts, it also presents an increased risk from unseen falling snags and weakened live trees. Night operations should be restricted in areas of high risk rated dead and dying trees.
- Environmental conditions that increase risk from hazard trees: Strong or gusty winds from storm cells. Air operations - water or retardant drops, rotor wash from helicopters. Steep slopes with rolling material. Erosion and undercut root systems. Diseased or bug-killed areas (Mountain Pine Beetle).
- Things to consider when assessing the potential dangers of hazard trees: Trees have been burning for an extended period. High-risk tree species (those that are known for rot and shallow root systems) in the area. Numerous downed trees/material. Broken tops and dead limbs overhead. Accumulation of downed limbs, tree decay, cavities, splits, cracks, lack of needles, bark, limbs or other indicators of overhead hazards. Roots damaged by equipment, fire or erosion create hazards.
- Mitigation measures to take: Identify and establish No-Work-Zones (NWZ) in all high-risk areas until the hazard has been mitigated. Instruct firefighters of established NWZ in briefings. Identify with flagging/signs, and show area on maps. Establish lookouts to protect NWZs. Assign only qualified sawyers and Falling Bosses. Order additional professional fallers in advance. Use heavy equipment, and blasters when appropriate. Plan a quick and safe escape routes. Do not turn your back on a falling tree or known hazard. Use lookouts to maintain secure felling areas. Maintain situational awareness.
