

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 31, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (146 new fires)
New large fires:	7 (*)
Large fires contained:	5
Uncontained large fires: **	20
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	5

Nationally, there are 24 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	7
New large fires:	1
Uncontained large fires:	11
Type 2 IMTs committed:	3

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Honey Prairie, Okefenokee NWR. Georgia IMT 2 (Floyd). Five miles northeast of Fargo, GA. Southern rough. Smoldering.

Simmons Road, North Carolina DFR. Transfer of command from North Carolina IMT 2 (Brandon) back to local unit will occur today. Fourteen miles southeast of Fayetteville, NC. Smoldering.

Juniper Road, North Carolina DFR. Thirteen miles northeast of Rocky Point, NC. Brush. Creeping and smoldering.

* **Mitre Peak**, Texas Forest Service. Ten miles northwest of Alpine, TX. Brush. Moderate fire behavior.

Stumper Flats, Florida DOF. Eleven miles southeast of Palm Bay, FL. Southern rough. No further information received.

Colcord, Oklahoma DOF. One mile northeast of Colcord, OK. Grass. No further information received.

Diamond Ridge, Oklahoma DOF. Four miles southeast of Cookson, OK. Hardwood litter. No further information received.

Stickcross Mountain, Oklahoma DOF. Two miles southeast of Tahlequah, OK. Hardwood litter. No further information received.

Larson Land & Cattle, Oklahoma DOF. Three miles west of Hart, MO. Hardwood litter. No further information received.

Mud Spring, Oklahoma DOF. Eight miles southeast of Stilwell, OK. Hardwood litter. No further information received.

White Lightning, Oklahoma DOF. Twelve miles southeast of Stilwell, OK. Hardwood litter. No further information received.

MVU – Monte Vista Unit, Cal Fire

Predictive Services Discussion: Scattered thunderstorms, mostly wet, will extend from the Southwest through the Great Basin and into the northern Rockies. The storms will be a mixture of wet/dry on the western and northern flanks of the thunderstorm area. Seasonal scattered showers and thunderstorms will occur over much of the eastern half of the nation. The excessive heat in the Great Plains will push northwards all the way to the Canadian border and nearby northern High Plains.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the
Miscellaneous Category.**

SAFENET

SAFENET is a form and process that provides a method for reporting unsafe situations on or off the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

● Discuss the methods for filing a SAFENET.

- Electronically by accessing the SAFENET website at safenet.nifc.gov or linking to it through the NIFC website.
- By hardcopy via US Mail. SAFENET paper forms are stamped, self-addressed, sealable forms that can be mailed from any US postal drop.

● Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.

- Increase the chances of finding an immediate solution.
- Keeps supervisor "in the loop."

● Discuss using SAFENET in situations other than fire.

- Prescribed fire
- All-risk
- Training

● Where does a SAFENET go, and what response can you expect?

- SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. . The SAFENET doesn't get posted to the web until 48 hours after it has been forwarded to the affected agencies for corrective action.
- Every new SAFENET is then forwarded to the affected agency's designated list of contacts, which usually includes the National or Regional Safety Officer.
- It is each agency's responsibility to ensure that corrective actions are taken.

● Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database. This statement could probably use a little work. We sometimes get "arm-chair quarterbacks" who weren't remotely involved with the incident submitting corrective actions. One example read something like, "This squad boss should be given a stern talking to by their supervisor and told 'Get it right or get out of fire,'" We don't want folks who weren't involved or in the chain of command making guess-work corrective actions. A corrective action is also sanitized to remove names or identifying information, and only goes public when the SAFENET does.

● Discuss using SAFENET to monitor safety issues other firefighters may be having.

Have an idea? Have feedback? Share it.
