

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 5, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (63 new fires)
New large fires:	4 (*)
Large fires contained:	3
Uncontained large fires: **	26
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	5
Type 2 IMTs committed:	6

Nationally, there are 14 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest (PL 4)

New fires:	4
New large fires:	1
Uncontained large fires:	9
Type 1 IMTs committed:	3
Type 2 IMTs committed:	3

Wallow, Apache-Sitgreaves NF. IMT 1 (Reinarz) and IMT 2 (Philbin). Twenty-three miles southwest of Alpine, AZ. Timber and grass. Extreme fire behavior. Structures threatened. Evacuations in effect.

Horseshoe 2, Coronado NF. Transfer of command from IMT 1 (Hughes) to IMT 1 (Thomas) will occur today. Seven miles southwest of Portal, AZ. Timber and grass. Active fire behavior. Structures threatened. Evacuations in effect.

Osha, Carson NF. IMT 2 (Templin). Four miles east of Penasco, NM. Timber. Moderate fire activity. Structures threatened.

Murphy, Coronado NF. IMT 2 (Nelson). Five miles east of Arivaca, AZ. Grass. Active fire behavior. Structures threatened.

Miller, Gila NF. Transfer of command from IMT 1 (Pierson) back to the local unit will occur today. Twenty-five miles north of Silver City, NM. Timber and grass. Minimal fire activity.

Riverside, Capitan District, New Mexico State Forestry. Twelve miles southeast of Hondo, NM. Grass. Moderate fire activity.

* **Gage**, Capitan District, New Mexico State Forestry. Six miles west of Pinon, NM. Slash and brush. Moderate fire activity.

Wells, Capitan District, New Mexico State Forestry. Twelve miles east of Pinon, NM. Slash and brush. No new information.

Durfee, Apache-Sitgreaves NF. Fifty miles south of Winslow, AZ. Timber and grass. No new information.

N2S - Cimarron District, New Mexico State Forestry

Southern Area (PL 3)

New fires:	31
New large fires:	2
Uncontained large fires:	13
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

NIMO (Gage) is assigned to manage large fires and provide support to initial attack operations for the West Branch Operational Area in Texas. Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Honey Prairie, Okefenokee NWR. IMT 1 (Wilder). IMT is also managing the Race Pond fire. Five miles northeast of Fargo, GA. Southern rough. Moderate fire activity.

Race Pond, Okefenokee NWR. Eleven miles south of Hoboken, GA. Southern rough. Minimal fire activity.

Pains Bay, Alligator River NWR. North Carolina IMT 2 (Hildreth). Nineteen miles south of Manns Harbor, NC. Timber and brush. Active fire behavior. Structures threatened.

Tejano Canyon, Texas Forest Service. Twelve miles west of Fort Davis, TX. Grass. Active fire behavior. Residences threatened.

* **Burn Wire**, Texas Forest Service. Four miles south of Kirbyville, TX. Timber. Active fire behavior. Structures threatened. Evacuations in effect.

* **Rogers Road**, Texas Forest Service. One mile west of Buna, TX. Timber. Active fire behavior. Structures threatened. Evacuations in effect.

Trail 3, Florida DOF. Six miles south of Indiantown, FL. Southern rough. No new information.

Sherrod, Texas Forest Service. Nineteen miles south of Big Spring, TX. Grass. Moderate fire activity. Reduction in acreage due to more accurate mapping.

Douglas Ranch, Texas Forest Service. Seven miles south of Electra, TX. Grass. Minimal fire activity. Reduction in acreage due to more accurate mapping.

Snyder, Texas Forest Service. Forty-six miles northeast of Abilene, TX. Grass. Moderate fire activity. Structures threatened.

Rocco, Texas Forest Service. Sixty-seven miles southwest of Fort Stockton, TX. Grass. Minimal fire activity.

Gully Branch, Florida DOF. Sixteen miles north of Eastpoint, FL. Southern rough. No new information.

Chainbreaker, National Forests in Mississippi. Nine miles southeast of McHenry, MS. Southern rough. Minimal fire activity.

Pen Branch, Mississippi Forestry Commission. Six miles southeast of Derby, MS. Closed timber litter. No new information. Last report unless new information is received.

LSX - Las Animas County

Predictive Services Discussion: Near critical to critical fire weather conditions associated with strong winds and low relative humidity will develop across parts of southern Nevada, southwest Utah and northwest Arizona. A strong West Coast low will continue to push rain into northern California, Oregon and northwestern Nevada. High pressure over the southern US will produce isolated thunderstorms over southeast Colorado, central and western New Mexico and eastern Arizona. Showers and thunderstorms will form along a front from New York to the Carolinas and westward to the upper Mississippi Valley. In Alaska, an upper low off the west coast will keep scattered showers and a few thunderstorms along the south central, southwest and west coasts. Isolated thunderstorms are possible in the interior.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Fire/Weather Behavior Category.

[Scenario](#)

Proper Use of Trigger Points

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18-Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of suppression resources
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan
