

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 26, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (100 new fires)
New large fires:	4 (*)
Large fires contained:	6
Uncontained large fires: **	42
Area Command Teams committed:	1
NIMOs committed:	3
Type 1 IMTs committed:	3
Type 2 IMTs committed:	10

Nationally, there are 17 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel, two each from the 146th Airlift Wing, California Air National Guard, Channel Islands, CA, and the 145th Airlift Wing, North Carolina Air National Guard, Charlotte, NC, are deployed to Albuquerque, NM. Col. Jay Pittman is the Air Expeditionary Group Commander.

Southwest (PL 5)

Type 2 IMTs committed:	4

NIMO (Gage) is assigned to the Coronado National Forest to provide strategic planning and large fire support.

Pacheco, Santa Fe NF. IMT 2 (Templin). Nine miles north of Santa Fe, NM. Timber and slash. Active fire behavior. Structures threatened.

Monument, Coronado National Memorial, NPS. IMT 1 (Poncin). Four miles east of Hereford, AZ. Grass. Minimal fire activity.

Wallow, Apache-Sitgreaves NF. Area Command Team (Waterbury). IMT 1 (Pincha-Tulley). IMT 2 (Walker and Rapp). Twenty-three miles southwest of Alpine, AZ. Timber and grass. Active fire behavior. Numerous structures threatened.

Wash, Apache-Sitgreaves NF. IMT 2 (Philbin). Eight miles east of Heber, AZ. Timber and grass. Minimal fire activity.

* **Kylesand**, Capitan District, New Mexico DOF. Five miles north of Maljamar, NM. Grass. Moderate fire activity.

Willow, Apache-Sitgreaves NF. Thirteen miles west of Forest Lakes, AZ. Timber and grass. No new information.

Track, Cimarron District, New Mexico DOF. One mile north of Raton, NM. Timber and grass. No new information.

New fires:	29
New large fires:	2
Uncontained large fires:	33
NIMOs committed:	2
Type 1 IMTs committed:	1
Type 2 IMTs committed:	6

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Juniper Road, North Carolina DFR. North Carolina IMT 2 (Hildreth). Thirteen miles northeast of Rocky Point, NC. Brush. Minimal fire activity. Numerous residences threatened.

East Texas Complex (3 fires), Texas Forest Service. NIMO (Houseman). Three miles south of Apple Springs, TX. Timber. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Honey Prairie, Okefenokee NWR. IMT 1 (Quesinberry). Five miles northeast of Fargo, GA. Southern rough. Moderate fire activity. Numerous structures threatened.

Pains Bay, Alligator River NWR. Unified command between NIMO (Custer) and North Carolina IMT 2 (Hendricks). Nineteen miles south of Manns Harbor, NC. Timber and brush. Minimal fire activity. Numerous structures threatened.

Sweat Farm Again, Georgia DOF. Georgia IMT 2 (Floyd). IMT is also managing the Race Pond fire. Twelve miles west of Waycross, GA. Southern rough. Minimal fire activity. Structures threatened. Reduction in acreage due to more accurate mapping.

Race Pond, Georgia DOF. Ten miles south of Waycross, GA. Hardwood litter. Minimal fire activity. Numerous residences threatened. Reduction in acreage due to more accurate mapping.

Impassable Bay Complex (2 fires), National Forests in Florida. IMT 2 (Kidd). Includes previous reported Kelly Road fire. Fifteen miles northeast of Lake City, FL. Southern rough. Minimal fire activity.

Espanola, Florida DOF. Florida IMT 2 (Graham). Seven miles southeast of Bunnell, FL. Southern rough. Minimal fire activity.

Simmons Road, North Carolina DFR. Nine miles northeast of Tar Heel, NC. Brush. Minimal fire activity. Structures threatened.

Oil Pad Complex (3 fires), Big Cypress Preserve, NPS. Twenty miles north of Ochopee, FL. Southern rough. No new information.

White Hat, Texas Forest Service. Eight miles west of Blackwell, TX. Grass. Minimal fire activity. Increase in acreage due to more accurate mapping.

Santa Fe, Florida DOF. Four miles south of Hampton, FL. Grass. No further information received. Last report unless significant activity occurs.

Bad Land, Florida DOF. Sixteen miles south of Bronson, FL. Southern rough. No further information received.

Maytown Road, Florida DOF. Two miles east of Farnton, FL. Southern rough. No further information received.

Richardson, Texas Forest Service. Seven miles northwest of Post, TX. Grass. Active fire behavior.

Trent Mesa, Texas Forest Service. Nine miles southwest of Merkel, TX. Brush. Minimal fire activity.

* **Willingham**, Texas Forest Service. Twelve miles west of Graford, TX. Slash, juniper and brush. No further information received.

Little Haw Creek, Florida DOF. Nine miles northeast of De Leon Springs, FL. Southern rough. No further information received.

Big Horn, Florida DOF. Six miles west of Gifford, FL. Southern rough. Minimal fire activity. Reduction in acreage due to more accurate mapping.

Alexander, Texas Forest Service. Nine miles south of Lueders, TX. Grass. No further information received.

Grits, St. Marks NWR. Four miles south of Sopchoppy, FL. Southern Rough. Minimal fire activity.

Mitchell 2, Texas Forest Service. Thirty-three miles southwest of Ozana, TX. Brush. Minimal fire activity.

Boyken, Texas Forest Service. Three miles southeast of Big Spring, TX. Grass. Structures threatened. No further information received.

Rock Creek, Texas Forest Service. Seven miles northeast of Aspermont, TX. Grass. No further information received.

JRM, Texas Forest Service. Five miles east of Throckmorton, TX. Grass. No further information received.

McDonald II, Texas Forest Service. Three miles southwest of Bellevue, TX. Grass. No further information received

Miles, Texas Forest Service. Four miles east of Darrouzett, TX. Grass. Minimal fire activity.

Finis, Texas Forest Service. Nine miles southeast of Graham, TX. Grass. No further information received.

Fork Mountain, Ouachita NF. Two miles south of Big Fork, AR. Hardwood litter. No new information. Last report unless new information is received.

*** Ranch Road**, Concho Field Office, BIA. Four miles south of Jet, OK. Hardwood litter. Minimal fire activity.

Predictive Services Discussion: Hot, dry weather will continue over the Southwest and Texas, southern Great Basin, and in Oklahoma. Moderately strong, gusty winds will occur over Arizona, New Mexico, and parts of both West Texas and Oklahoma. Variable amounts/areas of showers and thunderstorms will continue in Southern Area.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's Discussion is From
"This Day in History"**

"Lessons Learned" serve as brief summaries of powerful learning opportunities. You can use these summaries as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, and your unit.

Dude Fire – June 26th 1990 - Arizona

Incident Summary: June of 1990 will long be remembered as one of the hottest months in Arizona history. On June 26th the temperature rose to record temperatures of 122 F in Phoenix and to 106 F in Payson. In addition to the extreme temperatures, Arizona had been in a severe 3 year drought, the combination producing a critically high fire danger throughout the state, especially the Mogollon Rim country and the Tonto National Forest north of Payson. Fuels in the area are primarily ponderosa pine with an understory of mixed oak, manzanita, needle and leaf litter, and scattered large (greater than 6 inch diameter) dead logs. Much of the understory brush is heavily draped with very dry pine needles. Live fuel moisture of the manzanita and oak is very low (76%), fine dead fuel moisture is 3% and 8% for larger dead fuels.

At 1230 June 25th, 1990, a dry lightning storm starts a fire under the Mogollon Rim on the Payson Ranger District, Tonto NF Arizona. The fire is on a steep SW facing slope at 6400 ft elevation. At 1330, the fire is estimated from the air at 5 acres, 50 acres one hour later, and over 100 acres by 1615 with a spot fire one mile east of the main fire. By 1800 a Type II IMT has arrived and a Type I IMT and 18 crews had been ordered. The fire is being pushed by brisk down canyon winds and is 1900 acres by 0500 the 26th and is threatening the forest subdivision of Bonita Creek Estates. A convection column, aided by combustion, begins forming over the fire by 1000. The column continued to grow and becomes a fully mature thunderstorm by 1400. Radio and frequency issues are causing a breakdown in communication between the crews and the overhead team. The teams are transitioning mid-shift resulting in confusion between the crews and supervision. The thunderstorm begins to decay creating strong downbursts channeled by the topography, causing dramatic down and across slope fire spread on nearly all sides of the fire. Members of the Perryville Fire Crew will not be able to escape from the fast and erratic fire spread. **Five are injured. Six will die on the fireline.**

Lessons Learned Discussion Points

The fire behavior indicator system "Look Up, Look Down, Look Around" was developed in response to this tragedy fire.

- Using page 2 and 3 in your IRPG (2010), what indicators are most significant in your area to let you know the fire behavior may become problematic?

The Haines Index, a measure of the atmospheres effect on a fire's growth potential, was adopted for inclusion on Fire Weather forecasts issued by the National Weather Service.

- Review and discuss the Haines Index information on page 75 in your IRPG.

In his paper "[LCES and Other Thoughts](#)", Paul Gleason writes about kneeling next to one of the Perryville firefighters and of his promise to help end needless fatalities and near misses.

- Review page 6 in your IRPG and discuss how you and your crew establish and maintain LCES.
- Discuss the difference between establishing LCES and maintaining LCES.
