

**National Interagency Coordination Center
Incident Management Situation Report
Monday, March 14, 2011 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (80 new fires)
New large fires:	6 (*)
Large fires contained:	3
Uncontained large fires: **	16
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 1 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

New fires:	51
New large fires:	3
Uncontained large fires:	11

Big Trickle Ranch, Texas Forest Service. Started on private land three miles northeast of Walnut Springs, TX. Brush and grass. Minimal fire activity.

Enmin, Texas Forest Service. Started on private land 11 miles northwest of Perrin, TX. Brush and grass. Minimal fire activity.

Blanco, Oklahoma DOF. Four miles south of Blanco, OK. Grass. No new information.

Middle Mountain, Oklahoma DOF. Ten miles northwest of Clayton, OK. Grass. No new information. Last report unless new information is received.

Kentucky Rain, Osage Agency, BIA. Four miles east of Barnsdall, OK. Hardwood litter and grass. No new information.

Limestone, Oklahoma DOF. Five miles west of Wesley, OK. Grass. No new information. Last report unless new information is received.

Valley X, Oklahoma DOF. Five miles west of Wesley, OK. Grass. No new information.

* **Reynolds Lake**, Oklahoma DOF. Twelve miles northeast of Stringtown, OK. Grass. No further information received.

Herman Jones, Oklahoma DOF. Nine miles southeast of Stilwell, OK. Hardwood litter. No new information.

* **Glass Hollow**, Oklahoma DOF. Nine miles southeast of Stilwell, OK. Hardwood litter. No further information received.

*** Lumpy Gravy**, Oklahoma DOF. Four miles southeast of Stilwell, OK. Timber. No further information received.

Predictive Services Discussion: Rain and thunderstorms will move across the Tennessee Valley and central Gulf States while high pressure builds over the Plains, Great Lakes and Northeast. Pacific storm moving across the Northwest will produce snow and rain from Oregon and Washington to Utah and western Wyoming.

Today's discussion is from the
Miscellaneous Category.

ASH PIT HAZARDS

Ash pits are an inherent and hidden risk to wildland firefighters that can cause severe burns and injuries. Ash pits are created when a ground fire consumes underground fuels creating an empty space that is imperceptible from the surface.

- Environmental factors that increase the risk of ash pit formation after a wildfire:
 - Extensive root systems of trees and shrubs.
 - Deep duff or peat, the organic layer covering mineral soil.
 - Landscapes that have once been cultivated or manipulated by heavy equipment, old dozer piles, sawmills, timber sale yards or decking areas.
 - Small rodent holes that have become filled with decadent combustible debris, beaver holes near dams and stream beds, badger and coyote dens.
 - White ash is sometimes an indicator of ash pits as are swarms of hovering insects.
 - With the sun behind the suspected ash pit, look for small nearly translucent smokes that dissipate quickly above the ground.
 - Ash pits often give off the smell of incomplete combustion or of creosote burning.
- Mitigation measures to consider:
 - Identification of high risk landscape.
 - Identify and flag all hazardous discovered ash pits.
